

112TH CONGRESS  
2D SESSION

# S. RES. 535

Recognizing the goals and ideals of the Movement is Life Caucus.

---

## IN THE SENATE OF THE UNITED STATES

AUGUST 1, 2012

Ms. KLOBUCHAR (for herself and Mr. CHAMBLISS) submitted the following resolution; which was referred to the Committee on Health, Education, Labor, and Pensions

---

# RESOLUTION

Recognizing the goals and ideals of the Movement is Life  
Caucus.

Whereas arthritis is the number one cause of disability in the United States, according to the Centers for Disease Control and Prevention, affecting 50,000,000 Americans, and among the leading reasons for doctors' visits and missed work;

Whereas the Centers for Disease Control and Prevention finds that in 2003 arthritis cost the United States economy \$128,000,000,000 annually in medical costs and lost wages;

Whereas 27,000,000 Americans suffer from osteoarthritis (the most common form of arthritis) and almost 80 percent have some degree of movement limitation;

Whereas the onset of chronic joint pain and osteoarthritis can lead to disability and a loss of personal independence;

Whereas, women along with African-Americans and Latinos, the two largest racial and ethnic minority groups in the United States, face more severe osteoarthritis and disability, yet receive less than optimal access to diagnostic, medical, and surgical intervention than do other groups;

Whereas women and minorities experiencing chronic diseases (such as diabetes, obesity, and heart disease (all medical conditions positively impacted by physical activity)) struggle disproportionately with undiagnosed and diagnosed osteoarthritis;

Whereas there is a lack of awareness about the connection between musculoskeletal health disparities, increasing physical inactivity levels and disparities in diabetes, obesity, and heart disease among women, African-Americans and Latinos, which have a significant impact on increasing health care costs and workforce productivity;

Whereas the first Movement is Life National Summit in September 2010 facilitated a national dialogue among stakeholders engaged in the continuum of care of women, African-Americans, and Latinos, about musculoskeletal health disparities;

Whereas the National Movement is Life Work Group Caucus has been established and the third annual meeting will be held this September 16–18, 2012 in Washington, DC;

Whereas the National Movement is Life Work Group Caucus will facilitate the development of action plans to help reduce musculoskeletal health disparities; and

Whereas the National Movement is Life Work Group Caucus seeks to promote early intervention, slow musculoskeletal

disease progression, reduce disability, and encourage physical activity and daily movement in order to improve the health of those currently disadvantaged as well as the overall health of the nation: Now, therefore, be it

1       *Resolved*, That the Senate—

2               (1) recognizes the musculoskeletal health dis-  
3               parities present among women, African-Americans,  
4               and Latinos;

5               (2) acknowledges the dangers posed to these  
6               populations, from rising inactivity levels and the im-  
7               pact on increased risk of chronic diseases such as di-  
8               abetes, obesity, and heart disease;

9               (3) seeks to raise public awareness in these  
10               communities about osteoarthritis and the importance  
11               of early intervention;

12               (4) encourages physical activity and daily move-  
13               ment, in order to limit the exasperation of related  
14               chronic diseases and loss of independence; and

15               (5) commends the Movement is Life National  
16               Caucus for its efforts in creating a dialogue which  
17               draws attention to these health disparities which  
18               continue to impact our national economy and many  
19               lives around the country.
