503 Township 33S Range 4.5W, Township 34S Range 4.5W, Township 35S Range 4.5W,  
504 Township 36S Range 4.5W, Township 31S Range 4W, and Township 31S Range 3W.

505 (3) Printed copies of the maps referenced in Subsection (2) shall be available for  
506 inspection by the public at the offices of the Utah Association of Counties.

507 (4) The state finds with respect to the grazing zones described in Subsection (2) that:

508 (a) agricultural livestock industry on the lands comprising these zones has provided a  
509 significant contribution to the history, customs, culture, economy, welfare, and other values of  
510 each area for more than 100 years;

511 (b) the potential for abundant natural and vegetative resources exists within these zones  
512 if managed properly, that will support and expand continued, responsible agricultural livestock  
513 activities and wildlife habitat;

514 (c) agricultural livestock activities in these zones and the associated historic resources,  
515 human history, shaping of human endeavors, variety of cultural resources, landmarks,  
516 structures, and other objects of historic or scientific interest are worthy of recognition,  
517 preservation, and protection;

518 (d) (i) the highest management priority for lands within these zones is the preservation,  
519 restoration, and enhancement of watershed and rangeland health to sustain and expand forage  
520 production for both livestock grazing and wildlife habitat, and the restoration and development  
521 of historic, existing, and future livestock grazing and wildlife habitat resources in order to  
522 provide protection for the resources, objects, customs, culture, and values identified above; and

523 (ii) notwithstanding Subsection (4)(d)(i), if part or all of any zone lies within a sage

524 grouse management area, then the management priorities for such part shall be consistent with  
525 the management priorities set forth in Subsection (4)(d)(i) to the maximum extent consistent  
526 with the management priorities of the sage grouse management area;

527 (e) subject to Subsection (4)(d)(ii), responsible development of any deposits of energy  
528 and mineral resources, including oil, natural gas, oil shale, oil sands, coal, phosphate, gold,  
529 uranium, and copper, as well as areas with wind and solar energy potential, that may exist in  
530 these zones is compatible with the management priorities of Subsection (4)(d)(i) in these  
531 zones; and

532 (f) subject to Subsection (4)(d)(ii), responsible development of any recreation  
533 resources, including roads, campgrounds, water resources, trails, OHV use, sightseeing,  
534 canyoneering, hunting, fishing, trapping, and hiking resources that may exist in these grazing  
535 zones is compatible with the management priorities of Subsection (4)(d)(i) in these grazing  
536 zones.

537 (5) The state finds with respect to the zones described in Subsection (2) that the  
538 historic levels of livestock grazing activity and other values identified in Subsection (4) in each  
539 zone have greatly diminished, or are under other serious threat, due to:

540 (a) unreasonable, arbitrary, and unlawfully restrictive federal management policies,  
541 including:

542 (i) de facto managing for wilderness in nonwilderness areas and non-WSAs;

543 (ii) ignoring the chiefly valuable for grazing designation of the Secretary of the Interior  
544 applicable to each of these zones; and

545 (iii) the arbitrary administrative reductions in animal unit months of permitted forage;

546 (b) inflexible federal grazing practices that disallow grazing at different times each year  
547 proven to be most effective for maintaining and enhancing rangeland conditions;

548 (c) mismanagement of wild horses and burros resulting in competition for forage by  
549 excess and mismanaged populations of wild horses and burros in Beaver and Emery counties;

550 (d) improper management of vegetation resulting in the overgrowth of pinion, invasive  
551 species, and juniper, and other woody vegetation that:

552 (i) compromise watershed and rangeland health;

553 (ii) crowd out grazing forage;

554 (iii) degrade habitat and limit wildlife populations;

- 555 (iv) reduce water yield; and
- 556 (v) heighten the risk of catastrophic wildfire; and
- 557 (e) other practices that degrade overall rangeland health.
- 558 (6) To protect and preserve against the threats described in Subsection (5), the state
- 559 supports the following with respect to the zones described in Subsection (2):
- 560 (a) efficient and sustained policies, programs, and practices directed at preserving,
- 561 restoring, and enhancing watershed and rangeland health to maximize:
- 562 (i) all permitted forage production for livestock grazing and other compatible uses,
- 563 including flexible grazing on and off dates adaptive to yearly climate and range conditions; and
- 564 (ii) forage for fish and wildlife;
- 565 (b) a cooperative management approach by federal agencies, the state, and local
- 566 government agencies to achieve broadly supported management plans for the full development
- 567 of:
- 568 (i) forage resources for grazing livestock and wildlife; and
- 569 (ii) other uses compatible with livestock grazing and wildlife utilization;
- 570 (c) effective and responsible management of wild horses and burros to eliminate excess
- 571 populations; and
- 572 (d) effective and responsible management of wildlife habitat.
- 573 (7) The state requests that the federal agencies that administer lands within each
- 574 grazing zone:
- 575 (a) fully cooperate and coordinate with the state and the respective counties within
- 576 which each grazing zone is situated to develop, amend, and implement land and resource
- 577 management plans, and implement management decisions that are consistent with the
- 578 purposes, goals, and policies described in this section to the maximum extent allowed under
- 579 federal law;
- 580 (b) expedite the processing, granting, and streamlining of grazing permits, range
- 581 improvements, and applications to enhance and otherwise develop all existing and permitted
- 582 grazing resources located within each grazing zone, including renewable vegetative resources;
- 583 (c) allow continued maintenance and increased development of roads, power lines,
- 584 pipeline infrastructure, and other utilities necessary to achieve the goals, purposes, and policies
- 585 described in this section and consistent with multiple use and sustained yield principles;

586 (d) refrain from any planning decisions and management actions that will undermine,  
587 restrict, or diminish the goals, purposes, and policies for each grazing zone as stated in this  
588 section;

589 (e) subject to Subsection (4)(d)(ii), refrain from implementing a policy that is contrary  
590 to the goals and purposes described within this section; and

591 (f) refrain from implementing utilization standards less than 50%, unless:

592 (i) implementing a standard of less than 50% utilization on a temporary basis is  
593 necessary to resolve site-specific concerns; and

594 (ii) the federal agency consults, coordinates, and cooperates fully with local  
595 governments.

596 (8) (a) If a grazing zone described in Subsection (2) is managed or neglected in such a  
597 way as to increase the risk of catastrophic wildfire, and if the chief executive officer of a  
598 county or a county sheriff finds that the catastrophic wildfire risk adversely affects the health,  
599 safety, and welfare of the people of the political subdivision and that increased livestock  
600 grazing in part or all of the grazing zone would substantially reduce that adverse effect:

601 (i) Subsections 11-51-103(1)(a) and (b) shall govern and apply to the chief executive  
602 officer and the county sheriff with respect to making increased livestock grazing available in  
603 the grazing zone; and

604 (ii) Subsection 11-51-103(1)(b) shall govern and apply to the attorney general with  
605 respect to making increased livestock grazing available in the grazing zone.

606 (b) If a grazing zone described in Subsection (2) is managed or neglected in such a way  
607 as to increase the risk of catastrophic wildfire, and if the chief executive officer of a county or a  
608 county sheriff finds that the catastrophic wildfire risk constitutes an imminent threat to the  
609 health, safety, and welfare of the people of the political subdivision and that increased livestock  
610 grazing in part or all of the grazing zone would substantially reduce that imminent threat:

611 (i) Subsections 11-51-103(2) and (3) shall govern and apply to the chief executive  
612 officer and the county sheriff with respect to making increased livestock grazing available in  
613 the grazing zone; and

614 (ii) Subsection 11-51-103(3) and Section 11-51-104 shall govern and apply to the  
615 attorney general with respect to making increased livestock grazing available in the grazing  
616 zone.

617 (9) (a) The state recognizes the importance of all grazing districts on Utah BLM and  
618 Forest Service lands but establishes the grazing zones described in Subsection (2) to provide  
619 special protection and preservation against the identified threats found in Subsection (5) to  
620 exist in these zones.

621 (b) It is the intent of the state to designate additional grazing agricultural commodity  
622 zones in future years, if circumstances warrant special protection and preservation for new  
623 zones.

624 (10) The state calls upon applicable federal, state, and local agencies to coordinate with  
625 each other and establish applicable intergovernmental standing commissions, with membership  
626 consisting of representatives from the United States government, the state, and local  
627 governments to coordinate and achieve consistency in planning decisions and management  
628 actions in zones described in Subsection (2) in order to achieve the goals, purposes, and  
629 policies described in this section.

630 (11) Notwithstanding the provisions of this section, and subject to Subsection  
631 (4)(d)(ii), the state's mineral, oil, gas, and energy policies and plans on land within the zones  
632 described in Subsection (2) shall be governed by Sections [63J-4-401](#) and [63J-8-104](#).
