1	CONCURRENT RESOLUTION HIGHLIGHTING UTAH'S			
2	RARE EARTH MINERAL POSITION			
3	2022 GENERAL SESSION			
4	STATE OF UTAH			
5	Chief Sponsor: David P. Hinkins			
6	House Sponsor: Carl R. Albrecht			
7				
8	LONG TITLE			
9	General Description:			
10	This resolution recognizes the state of Utah's unique position as an essential source for			
11	critical minerals and encourages cooperation between state and federal stakeholders to			
12	take full advantage of the essential critical minerals and rare earth elements found in the			
13	state of Utah.			
14	Highlighted Provisions:			
15	This resolution:			
16	recognizes Utah as a known source of 28 of the 35 current federally listed critical			
17	minerals necessary for national defense and economic prosperity;			
18	recognizes that Utah consistently ranks as a top 10 state for mining with a 2020			
19	estimated \$3.7 billion in mining production value;			
20	 recognizes that renewable energy production is increasing across the state and the 			
21	country and there is a heightened need for critical minerals, rare earth elements, and			
22	many other minerals, including copper, to meet the infrastructure, collection,			
23	distribution, and transmission requirements to foster a reliable and affordable			
24	energy economy;			
25	recognizes that critical minerals and traditional mineral resources are also used for a			
26	variety of other essential purposes beyond energy production, including			
27	manufacturing, technology, defense, aerospace, fertilizer, and medical application;			
28	and			
29	 resolves that the state of Utah and relevant federal agencies work together to

promote national security, economic prosperity, and sustainability through efficient promotion
and utilization of the many resources of the state of Utah.
Special Clauses:
None
Be it resolved by the Legislature of the state of Utah, the Governor concurring therein:
WHEREAS, the population of the state of Utah is increasing and there exists an urgent
need to develop additional collection, distribution, and transmission infrastructure to ensure a
reliable and affordable energy future;
WHEREAS, President Joseph R. Biden's Executive Order 14017 on America's Supply
Chains identifies critical minerals and rare earth elements as essential to the American
economy;
WHEREAS, the Biden Administration's Report on Building Resilient Supply Chains
finds that the United States must secure reliable and sustainable supplies of critical minerals
and metals to ensure resilience across United States' manufacturing and defense needs, and do
so in a manner consistent with America's labor, environmental, equity and other values;
WHEREAS, Utah is an all-of-the-above energy state;
WHEREAS, fostering an innovative traditional and renewable energy economy is a
growing trend with widespread support within the state and across the nation;
WHEREAS, approximately 23% of Utah, or 12,628,600 acres, receives the highest
level of protection available as national parks, wilderness areas, national monuments, and other
highly restricted federal lands;
WHEREAS, the state of Utah is a state consisting of approximately 71% of Utah or
Utah's land area, over 38,578,390 acres as public lands;
WHEREAS, the state of Utah opposes landscape scale designations that limit access to
public lands for energy development, mineral extraction, and other practices;
WHEREAS, access to public lands is needed in many cases for energy production and

to obtain mineral resources required for infrastructure development;

57

58	WHEREAS, it is not possible or economically feasible to promote a renewable energy
59	economy without the mining industry;
60	WHEREAS, Utah is a top ten state for mining with a 2020 estimated mineral
61	production value of \$3.7 billion;
62	WHEREAS, the people of Utah have a long history of successful stewardship and
63	reclamation over the state's resources;
64	WHEREAS, the federal government has established a list of critical minerals for
65	national defense and economic prosperity;
66	WHEREAS, Utah has known sources of 28 of the 35 current federally listed critical
67	mineral resources;
68	WHEREAS, Utah is the primary global provider of beryllium, the only domestic
69	producer of magnesium metal, and one of only two states producing lithium;
70	WHEREAS, the Bingham Canyon Mine produces platinum, palladium, rhenium, and
71	soon will produce tellurium from byproducts of copper, gold, and silver mining;
72	WHEREAS, the federal critical mineral list does not contain all mineral resources
73	required to facilitate a renewable energy industry or infrastructure development;
74	WHEREAS, copper is Utah's most valuable metal commodity and is required for all
75	energy projects and transmission infrastructure;
76	WHEREAS, uranium is readily available in Utah and uranium is now considered a fuel
77	mineral and is consequently not eligible for listing under the federal list for critical minerals;
78	and
79	WHEREAS, the combination of land access, mining, and energy development provide
80	economic support for citizens of the state and allow for affordable energy resources:
81	NOW, THEREFORE, BE IT RESOLVED that the Legislature of the state of Utah, the
82	Governor concurring therein, expresses through this resolution the necessity of ensuring access
83	to public lands, the continuation of the mineral extraction industry in Utah, and sustainable
84	development of renewable energy on public lands and through the state of Utah.
85	BE IT FURTHER RESOLVED that the Legislature and the Governor find that federal

designations of Utah's lands and waters, without state legislative approval, is hostile to state sovereignty, and can hinder the efforts of the state and federal agencies to promote national security and economic prosperity.

BE IT FURTHER RESOLVED that the Legislature and the Governor find that the state of Utah is a public land state that stands able and willing to promote mineral extraction and the development of energy resources, including renewable energy resources, for the citizens of Utah and other Americans.
