

No. 38. An act relating to pre K-12 and higher education partnerships.

(H.405)

It is hereby enacted by the General Assembly of the State of Vermont:

Sec. 1. POLICY, FINDINGS, AND PURPOSE

(a) It is the policy of the state of Vermont to make available as many opportunities as possible for Vermont students to succeed in their Pre-K-12 education, to encourage and facilitate high school students to progress toward higher education, and to prepare postsecondary students to succeed.

(b) Completing high school cannot be considered the minimum educational attainment. As stated by President Obama in his address before Congress on February 24, 2009, every American should “commit to at least one year or more of higher education or career training. This can be community college or a four-year school; vocational training or an apprenticeship. But whatever the training may be, every American will need to get more than a high school diploma. And dropping out of high school is no longer an option. It’s not just quitting on yourself, it’s quitting on your country — and this country needs and values the talents of every American. That is why we will provide the support necessary to ... meet a new goal: By 2020, America will once again have the highest proportion of college graduates in the world.”

(c) For Vermont to thrive economically it must develop, attract, and retain a well-educated and highly skilled citizenry, who will in turn enable the development, recruitment, and retention of successful businesses and support

healthy communities.

(d) Higher levels of educational attainment translate into higher earnings and tax revenues, increased civic engagement and community contributions, better overall health, decreased dependency on government services, and an improved quality of life.

(e) To increase educational attainment among Vermonters, educational partnerships between higher education and the Pre-K-12 educational system are crucial to increasing postsecondary aspirations, increasing the enrollment of Vermont high school graduates in higher education programs, increasing the postsecondary degree completion rates of Vermont students, and increasing public awareness of the economic, intellectual, and societal benefits of higher education.

(f) To track student performance throughout a student's academic career and to understand better the programs and services that increase educational attainment and reduce performance disparities between students of different socioeconomic backgrounds, it is essential that Vermont implement a statewide Pre-K-12 longitudinal data system.

Sec. 2. STRATEGIES TO EXPAND EDUCATIONAL OPPORTUNITIES

(a) The Vermont state colleges, the University of Vermont, the association of Vermont independent colleges, the Vermont Student Assistance Corporation, and the department of education (collectively, the "working

group”) shall work together to develop strategies to expand educational opportunities for Vermont students to succeed in elementary and secondary school and to be prepared to succeed in postsecondary education as well. The working group, which shall be chaired by the Vermont state colleges, shall consult with representatives of institutions of higher education and of the Pre-K-12 education system, and with the workforce development, business, and industry communities.

(b) On or before January 15, 2010, the working group shall submit a report to the general assembly detailing its recommended strategies. When developing its recommendations, the working group shall consider and evaluate:

(1) Evidence-based educational models in Vermont and elsewhere, including early college programs, alternatives to a senior year, Pre-K-12 laboratory schools, statewide career awareness and postsecondary aspiration programs, and alternative school calendars.

(2) Partnerships between higher education and the Pre-K-12 system to improve instruction and increase postsecondary aspiration, preparedness, continuation, and completion rates.

(3) Potential funding sources for implementing its recommendations.

Sec. 3. ELECTRONIC STUDENT LONGITUDINAL DATA SYSTEM

The commissioner of education shall:

(1) Examine and evaluate student longitudinal data systems that are currently available and select one system to implement statewide. To the extent possible, the selected system shall be aligned with postsecondary data systems to create a statewide Pre-K-16 longitudinal data system. In addition, it shall comply with the Family Educational Rights and Privacy Act (20 U.S.C. § 1232g), the Health Insurance Portability and Accountability Act (Pub. Law No. 104-191 §§ 262,264; 45 C.F.R. §§ 160-164), and any other applicable state or federal privacy law or regulation and shall conform to generally recognized data security standards.

(2) Apply for competitive grant monies through the American Recovery and Investment Act of 2009, Title XIII, Institute of Education Sciences, to fund implementation of a statewide Pre-K-12 longitudinal data system serving each school district, supervisory union, and technical center service region.

(3) To the extent funds are available, begin phased implementation of the data system no later than January 1, 2010, to be complete in all districts in the state by January 1, 2017.

(4) Report to the senate and house committees on education on or before January 15, 2010 regarding:

(A) The total grant dollars received, if any.

(B) The design and scope of the system.

(C) The implementation plan for the system, including transitional planning.

(D) Barriers to full implementation and recommendations for legislative or other action to ensure that all districts are able to participate.

(E) Options available to meet the purposes of this section if the state's application for grant funding was unsuccessful.

(5) Report to the senate and house committees on education on or before January 15, 2011 regarding implementation of this section and in January of each subsequent year until implementation is complete.

Approved: May 26, 2009
