EFFECT:

- Removes the requirement that the Optometry Board (Board) collaborate with the Washington Medical Commission to designate postgraduate courses that provide adequate training on the advanced procedures that may only be performed with an endorsement.
- Modifies the definition of the practice of optometry by: (1) restricting light therapy to non-laser light therapy; (2) removing references to "by any means" as it relates to removal of nonpenetrating foreign bodies and debridement of tissues.
- Requires the Board to develop a process for an optometrist with an endorsement to submit information to the Board on the outcome of every advanced procedure performed, which an optometrist must submit every year at license renewal until December 31, 2028.
- Modifies the report the Board and Department of Health (DOH) must produce on the outcomes and complications of any advance procedures, by requiring the Board and DOH to submit an annual report compiling the outcome data submitted yearly by optometrists with endorsements until December 31, 2028.
- Specifies that the practice of optometry does not include suturing.
- Corrects outdated references by replacing the United States Office of Education and Council on Postsecondary Accreditation with the United States Department of Education and the Council on Higher Education Accreditation.
