The cash receipts and expenditure estimates on this page represent the most likely fiscal impact. Factors impacting the precision of these estimates, and alternate ranges (if appropriate), are explained in Part II.

Check applicable boxes and follow corresponding instructions:

- If fiscal impact is greater than \$50,000 per fiscal year in the current biennium or in subsequent biennia, complete entire fiscal note form Parts I-V.
- If fiscal impact is less than \$50,000 per fiscal year in the current biennium or in subsequent biennia, complete this page only (Part I).
- Capital budget impact, complete Part IV.
- Requires new rule making, complete Part V.

Part II: Narrative Explanation

II. A - Brief Description Of What The Measure Does That Has Fiscal Impact

Significant provisions of the bill and any related workload or policy assumptions that have revenue or expenditure impact on the responding agency by section number.

Differences between SHB 2293 and HB 2293:

- Directs the work group to identify avian species that contribute to the predation of juvenile salmon at a population level instead of all avian species that predate on juvenile salmon.
- Directs the work group to determine whether the avian species predating on juvenile salmon impact the recovery of threatened and endangered species of salmon instead of identifying whether they are overpopulated or overconsuming.
- Removes the requirement to identify regulatory restrictions for harvesting or abating overpopulated avian species.
- Adds one member each from the Oregon Department of Fish and Wildlife, the Puget Sound Partnership, and an avian conservation organization to the work group.
- Increases recreational fishers and commercial fishers from one member each to two members each.
- Changes the report due date to June 30, 2025, instead of annually through 2034.
- Changes the expiration to July 1, 2026, instead of July 1, 2034.

New fiscal impact description:

Section 1 directs the Department to form a workgroup to identify avian species contributing to juvenile salmon predation and determine whether consumption of juvenile salmon by avian species impacts the recovery of threatened and endangered salmon.

Section 4 directs the work group to report to the Department and legislature by June 30, 2025.

II. B - Cash receipts Impact

Cash receipts impact of the legislation on the responding agency with the cash receipts provisions identified by section number and when appropriate, the detail of the revenue sources. Description of the factual basis of the assumptions and the method by which the cash receipts impact is derived. Explanation of how workload assumptions translate into estimates. Distinguished between one time and ongoing functions.

II. C - Expenditures

Agency expenditures necessary to implement this legislation (or savings resulting from this legislation), with the provisions of the legislation that result in the expenditures (or savings) identified by section number. Description of the factual basis of the assumptions and the method by which the expenditure impact is derived. Explanation of how workload assumptions translate into cost estimates. Distinguished between one time and ongoing functions.

Section 1 Costs:

Fiscal year 2025:

- \$140,000 for 1.0 FTE Environmental Planner 5 to plan and facilitate workgroup meetings, provide technical and policy guidance, represent WDFW in the avian predation workgroup, coordinate agency priorities and actions, and prepare report, Objects A & B.
- \$12,000 for 0.1 FTE Fish & Wildlife Biologist 4 to provide data and technical expertise on life history and population-level considerations for avian predators, especially colonial waterbirds, Objects A & B.
- \$2,600 for facilities and meals for in-person work group meetings, Object E.
- \$1,000 for travel associated with in-person work group meetings, Object G.

Goods and services, Object E, includes \$7,000 per FTE, per year, for WDFW standard costs, which cover an average employee's supplies, communications, training, and subscription costs per year.

An infrastructure and program support rate of 36.03% is included in Object T and is calculated based on WDFW's federally approved indirect rate.

Total fiscal year 2025 costs: \$222,000
