13 Sec. 2116. RCW 77.95.010 and 1995 1st sp.s. c 2 s 33 are each 14 amended to read as follows:

15 Currently, many of the salmon stocks of Washington state are 16 critically reduced from their sustainable level. The best interests of 17 all fishing groups and the citizens as a whole are served by a stable 18 and productive salmon resource. Immediate action is needed to reverse 19 the severe decline of the resource and to insure its very survival. 20 The legislature finds a state of emergency exists and that immediate 21 action is required to restore its fishery.

Disagreement and strife have dominated the salmon fisheries for 22 23 many years. Conflicts among the various fishing interests have only served to erode the resource. It is time for the state of Washington 24 25 to make a major commitment to increasing productivity of the resource 26 and to move forward with an effective rehabilitation and enhancement The ((commission)) department is directed to dedicate its 27 program. 28 efforts ((and the efforts of the department)) to seek resolution to the 29 many conflicts that involve the resource.

30 Success of the enhancement program can only occur if projects 31 efficiently produce salmon or restore habitat. The expectation of the 32 program is to optimize the efficient use of funding on projects that 33 will increase artificially and naturally produced salmon, restore and 34 improve habitat, or identify ways to increase the survival of salmon. 35 The full utilization of state resources and cooperative efforts with 36 interested groups are essential to the success of the program.

Sec. 2117. RCW 77.95.020 and 1995 1st sp.s. c 2 s 34 are each 1 2 amended to read as follows:

3 (1) The ((commission)) department shall develop long-term regional policy statements regarding the salmon fishery resources before 4 5 December 1, 1985. The ((commission)) department shall consider the following in formulating and updating regional policy statements: б

- 7 (a) Existing resource needs;
 - (b) Potential for creation of new resources;

(c) Successful existing programs, both within and outside the 9 10 state;

- (h) Salmon advisory council recommendations. 15

(2) The ((commission)) department shall review and update each 16 17 policy statement at least once each year.

Joint or cooperative enhancement projects 35 shall be considered for funding.

36 (2) The following criteria shall be used by the ((commission)) 37 department in formulating the project proposals:

The legislature finds that it is in the best interest of the salmon resource of the state to encourage the development of regional fisheries enhancement groups. The accomplishments of one existing group, the Grays Harbor fisheries enhancement task force, have been widely recognized as being exemplary. The legislature recognizes the potential benefits to the state that would occur if each region of the state had a similar group of dedicated citizens working to enhance the salmon resource.

The legislature authorizes the formation of regional fisheries enhancement groups. These groups shall be eligible for state financial support and shall be actively supported by the ((commission and the)) department. The regional groups shall be operated on a strictly nonprofit basis, and shall seek to maximize the efforts of volunteer and private donations to improve the salmon resource for all citizens of the state.

10 **Sec. 2121.** RCW 77.95.090 and 2009 c 340 s 4 are each amended to 11 read as follows:

All revenue from the department's sale of salmon carcasses and eggs that return to group facilities shall be deposited in the regional fisheries enhancement group account for use by the regional fisheries enhancement group that produced the surplus. The ((commission)) department shall adopt rules to implement this section pursuant to chapter 34.05 RCW.

34 **Sec. 2122.** RCW 77.95.100 and 2010 1st sp.s. c 7 s 82 are each 35 amended to read as follows:

 The ((commission)) department shall develop guidelines for providing
 funds to the regional fisheries enhancement groups.

4 **Sec. 2123.** RCW 77.95.140 and 1995 1st sp.s. c 2 s 41 are each 5 amended to read as follows:

The plan shall include strategies for employing displaced timber workers to conduct salmon restoration and other tasks 8 9 identified in the plan. The plan shall incorporate the best available 10 technology in order to achieve maximum restoration of depressed salmon 11 stocks. The plan must encourage the restoration of natural spawning 12 areas and natural rearing of salmon but must not preclude the 13 development of an active hatchery program.

14 **Sec. 2124.** RCW 77.95.200 and 2009 c 333 s 29 are each amended to 15 read as follows:

(1) The department shall develop and implement a program utilizing
remote site incubators in Washington state. The program shall identify
sites in tributaries that are suitable for reestablishing selfsustaining, locally adapted populations of coho, chum, or chinook
salmon. The initial selection of sites shall be updated annually.

(2) The department may only approve a remote site incubator project if the department deems it is consistent with the conservation of wild salmon and trout. The department shall only utilize appropriate salmonid eggs in remote site incubators, and may acquire eggs by gift or purchase.

The response should also include any 16 suggested modifications to the proposal which would increase its 17 18 likelihood of approval and the date by which such modified proposal 19 could be expected to be accepted. If the proposal is rejected, the department must provide in writing the reasons for rejection. 20 The 21 volunteer group may request the director or the director's designee to 22 review information provided in the response.

23 (3) The priority of the uses to which eggs, seed, juveniles, or 24 brood stock are put. Use by cooperative projects shall be second in 25 priority only to the needs of programs of the department or of other 26 public agencies within the territorial boundaries of the state. Sales of eggs, seed, juveniles, or brood stock have a lower priority than use 27 28 for cooperative projects. The rules must identify and implement 29 appropriate protocols for brood stock handling, including the 30 outplanting of adult fish, spawning, incubation, rearing, and release and establish a prioritized schedule for implementation of chapter 337, 31 32 Laws of 2001, and shall include directives for allowing more hatchery salmon to spawn naturally in areas where progeny of hatchery fish have 33 spawned, including the outplanting of adult fish, in order to increase 34 35 the number of viable salmon eggs and restore healthy numbers of fish 36 within the state.

The public policy of the state of Washington on gambling is to keep the criminal element out of gambling and to promote the social welfare of the people by limiting the nature and scope of gambling activities and by strict regulation and control.

25 It is hereby declared to be the policy of the legislature, recognizing the close relationship between professional gambling and 26 organized crime, to restrain all persons from seeking profit from 27 28 professional gambling activities in this state; to restrain all persons 29 from patronizing such professional gambling activities; to safeguard 30 the public against the evils induced by common gamblers and common gambling houses engaged in professional gambling; and at the same time, 31 both to preserve the freedom of the press and to avoid restricting 32 participation by individuals in activities and social pastimes, which 33 34 activities and social pastimes are more for amusement rather than for 35 profit, do not maliciously affect the public, and do not breach the 36 peace.

1 The legislature further declares that the raising of funds for the 2 promotion of bona fide charitable or nonprofit organizations is in the 3 public interest as is participation in such activities and social 4 pastimes as are hereinafter in this chapter authorized.

5 The legislature further declares that the conducting of bingo, 6 raffles, and amusement games and the operation of punchboards, pull-7 tabs, card games and other social pastimes, when conducted pursuant to 8 the provisions of this chapter and any rules and regulations adopted 9 pursuant thereto, are hereby authorized, as are only such lotteries for 10 which no valuable consideration has been paid or agreed to be paid as 11 hereinafter in this chapter provided.

12 The legislature further declares that fishing derbies shall not 13 constitute any form of gambling and shall not be considered as a 14 lottery, a raffle, or an amusement game and shall not be subject to the 15 provisions of this chapter or any rules and regulations adopted 16 hereunder.

The legislature further declares that raffles authorized by the ((fish and wildlife commission)) department of conservation and <u>recreation</u> involving hunting big game animals or wild turkeys shall not be subject to the provisions of this chapter or any rules and regulations adopted hereunder, with the exception of this section and RCW 9.46.400.

The dock cannot be sold or leased separately from the 5 upland residence. The dock cannot be used to moor boats for commercial 6 7 or residential use. This permission is subject to applicable local, 8 state, and federal rules and regulations governing location, design, 9 construction, size, and length of the dock. Nothing in this subsection 10 (1) prevents the abutting owner from obtaining a lease if otherwise provided by law. 11

12 (2) The abutting residential owner to state-owned shorelands, 13 tidelands, or related beds of navigable waters, other than harbor 14 areas, may install and maintain a mooring buoy without charge if the boat that is moored to the buoy is used for private recreational 15 purposes, the area is not subject to prior rights, including any rights 16 17 of upland, tideland, or shoreland owners as provided in RCW 79.125.400, 79.125.460, 79.125.410, and 79.130.010, and the buoy will not obstruct 18 19 the use of mooring buoys previously authorized by the department.

(a) The buoy must be located as near to the upland residence as practical, consistent with applicable rules and regulations and the provisions of this section. The buoy must be located, or relocated if necessary, to accommodate the use of lawfully installed and maintained buoys.

(b) If two or more residential owners, who otherwise qualify for 25 26 free use under the provisions of this section, are in dispute over 27 assertion of rights to install and maintain a mooring buoy in the same 28 location, they may seek formal settlement through adjudication in 29 superior court for the county in which the buoy site is located. In 30 the adjudication, preference must be given to the residential owner that first installed and continually maintained and used a buoy on that 31 32 site, if it meets all applicable rules, regulations, and provisions of this section, and then to the owner of the residential property nearest 33 34 the site. Nothing in this section requires the department to mediate 35 or otherwise resolve disputes between residential owners over the use 36 of the same site for a mooring buoy.

37

(c) The buoy cannot be sold or leased separately from the abutting

1 residential property. The buoy cannot be used to moor boats for 2 commercial or residential use, nor to moor boats over sixty feet in 3 length.

(e) The permission granted in this subsection (2) is subject to 9 10 applicable local, state, and federal rules and regulations governing location, design, installation, maintenance, and operation of the 11 12 mooring buoy, anchoring system, and moored boat. Nothing in this subsection (2) prevents a boat owner from obtaining a lease if 13 14 otherwise provided by law. This subsection (2) also applies to areas that have been designated by the commissioner or the ((fish and 15 wildlife commission)) department of conservation and recreation as 16 17 aquatic reserves.

(3) This permission to install and maintain a recreational dock or 18 mooring buoy may be revoked by the department, or the department may 19 direct the owner of a recreational dock or mooring buoy to relocate 20 21 their dock or buoy, if the department makes a finding of public 22 necessity to protect waterward access, ingress rights of other 23 landowners, public health or safety, or public resources. 24 Circumstances prompting a finding of public necessity may include, but 25 are not limited to, the dock, buoy, anchoring system, or boat posing a 26 hazard or obstruction to navigation or fishing, contributing to degradation of aquatic habitat, or contributing to decertification of 27 shellfish beds otherwise suitable for commercial or recreational 28 29 harvest. The revocation may be appealed as provided for under RCW 30 79.105.160.

(4) Nothing in this section authorizes a boat owner to abandon a
 vessel at a recreational dock, mooring buoy, or elsewhere.

CONSOLIDATING THE RECREATION AND CONSERVATION FUNDING OFFICE INTO THE DEPARTMENT OF CONSERVATION AND RECREATION

PART 4

4 **Sec. 4001.** RCW 79A.25.005 and 2007 c 241 s 39 are each amended to 5 read as follows:

б (1) As Washington begins its second century of statehood, the 7 legislature recognizes that renewed efforts are needed to preserve, conserve, and enhance the state's recreational resources. 8 Rapid 9 population growth and increased urbanization have caused a decline in 10 land for recreation and resulted in overcrowding and suitable 11 deterioration of existing facilities. Lack of adequate recreational 12 resources directly affects the health and well-being of all citizens of 13 the state, reduces the state's economic viability, and prevents 14 Washington from maintaining and achieving the quality of life that it 15 deserves.

16 It is therefore the policy of the state and its agencies to 17 preserve, conserve, and enhance recreational resources and open space. In carrying out this policy, the mission of the recreation and 18 conservation funding board and ((its office)) the department of 19 20 conservation and recreation is to (a) create and work actively for the 21 implementation of a unified statewide strategy for meeting the 22 recreational needs of Washington's citizens, (b) represent and promote 23 the interests of the state on recreational issues in concert with other state and local agencies and the governor, (c) encourage and provide 24 25 interagency and regional coordination, and interaction between public and private organizations, (d) administer recreational grant-in-aid 26 programs and provide technical assistance, and 27 (e) serve as а repository for information, studies, research, and other data relating 28 29 to recreation.

30 (2) Washington is uniquely endowed with fresh and salt waters rich 31 in scenic and recreational value. This outdoor heritage enriches the 32 lives of citizens, attracts new residents and businesses to the state, 33 and is a major support of its expanding tourist industry. Rising 34 population, increased income and leisure time, and the rapid growth of 35 boating and other water sports have greatly increased the demand for 36 water related recreation, while waterfront land is rapidly rising in

value and disappearing from public use. There is consequently an 1 2 urgent need for the acquisition or improvement of waterfront land on fresh and salt water suitable for marine recreational use by Washington 3 residents and visitors. To meet this need, it is necessary and proper 4 that the portion of motor vehicle fuel taxes paid by boat owners and 5 operators on fuel consumed in their watercraft and not reclaimed as б presently provided by law should be expended for the acquisition or 7 8 improvement of marine recreation land on the Pacific Ocean, Puget 9 Sound, bays, lakes, rivers, reservoirs and other fresh and salt waters 10 of the state.

11 **Sec. 4002.** RCW 79A.25.010 and 2007 c 241 s 40 are each amended to 12 read as follows:

Sec. 5004. RCW 39.04.155 and 2009 c 74 s 1 are each amended to 30 read as follows: 31 (1) This section provides uniform small works roster provisions to 32 award contracts for construction, building, renovation, remodeling, 33 34 alteration, repair, or improvement of real property that may be used by 35 state agencies and by any local government that is expressly authorized 36 to use these provisions. These provisions may be used in lieu of other

procedures to award contracts for such work with an estimated cost of three hundred thousand dollars or less. The small works roster process includes the limited public works process authorized under subsection (3) of this section and any local government authorized to award contracts using the small works roster process under this section may award contracts using the limited public works process under subsection (3) of this section.

8 (2)(a) A state agency or authorized local government may create a 9 single general small works roster, or may create a small works roster 10 for different specialties or categories of anticipated work. Where 11 small works rosters may make distinctions between applicable, 12 contractors based upon different geographic areas served by the 13 contractor. The small works roster or rosters shall consist of all responsible contractors who have requested to be on the list, and where 14 15 required by law are properly licensed or registered to perform such work in this state. A state agency or local government establishing a 16 17 small works roster or rosters may require eligible contractors desiring 18 to be placed on a roster or rosters to keep current records of any 19 applicable licenses, certifications, registrations, bonding, insurance, 20 or other appropriate matters on file with the state agency or local 21 government as a condition of being placed on a roster or rosters. At 22 least once a year, the state agency or local government shall publish 23 in a newspaper of general circulation within the jurisdiction a notice 24 of the existence of the roster or rosters and solicit the names of contractors for such roster or rosters. In addition, responsible 25 26 contractors shall be added to an appropriate roster or rosters at any 27 time they submit a written request and necessary records. Master 28 contracts may be required to be signed that become effective when a 29 specific award is made using a small works roster.

30 (b) A state agency establishing a small works roster or rosters shall adopt rules implementing this subsection. A local government 31 32 establishing a small works roster or rosters shall adopt an ordinance 33 or resolution implementing this subsection. Procedures included in adopted by the department of general 34 rules administration in 35 implementing this subsection must be included in any rules providing 36 for a small works roster or rosters that is adopted by another state 37 agency, if the authority for that state agency to engage in these activities has been delegated to it by the department of general 38

administration under chapter 43.19 RCW. An interlocal contract or agreement between two or more state agencies or local governments establishing a small works roster or rosters to be used by the parties to the agreement or contract must clearly identify the lead entity that is responsible for implementing the provisions of this subsection.

6 (C) Procedures shall be established for securing telephone, 7 written, or electronic quotations from contractors on the appropriate 8 small works roster to assure that a competitive price is established 9 and to award contracts to the lowest responsible bidder, as defined in RCW 39.04.010. Invitations for quotations shall include an estimate of 10 11 the scope and nature of the work to be performed as well as materials 12 and equipment to be furnished. However, detailed plans and 13 specifications need not be included in the invitation. This subsection does not eliminate other requirements for architectural or engineering 14 approvals as to quality and compliance with building codes. Quotations 15 may be invited from all appropriate contractors on the appropriate 16 17 small works roster. As an alternative, quotations may be invited from 18 at least five contractors on the appropriate small works roster who 19 have indicated the capability of performing the kind of work being 20 contracted, in a manner that will equitably distribute the opportunity 21 among the contractors on the appropriate roster. However, if the 22 estimated cost of the work is from one hundred fifty thousand dollars 23 to three hundred thousand dollars, a state agency or local government 24 that chooses to solicit bids from less than all the appropriate contractors on the appropriate small works roster must also notify the 25 26 remaining contractors on the appropriate small works roster that 27 quotations on the work are being sought. The government has the sole option of determining whether this notice to the remaining contractors 28 is made by: (i) Publishing notice in a legal newspaper in general 29 circulation in the area where the work is to be done; (ii) mailing a 30 notice to these contractors; or (iii) sending a notice to these 31 contractors by facsimile or other electronic means. For purposes of 32 this subsection (2)(c), "equitably distribute" means that a state 33 agency or local government soliciting bids may not favor certain 34 contractors on the appropriate small works roster over other 35 36 contractors on the appropriate small works roster who perform similar 37 services.

(d) A contract awarded from a small works roster under this section
 need not be advertised.

3 (e) Immediately after an award is made, the bid quotations obtained
4 shall be recorded, open to public inspection, and available by
5 telephone inquiry.

6 (3) In lieu of awarding contracts under subsection (2) of this section, a state agency or authorized local government may award a 7 8 contract for work, construction, alteration, repair, or improvement projects estimated to cost less than thirty-five thousand dollars using 9 the limited public works process provided under this subsection. 10 Public works projects awarded under this subsection are exempt from the 11 12 other requirements of the small works roster process provided under 13 subsection (2) of this section and are exempt from the requirement that contracts be awarded after advertisement as provided under 14 RCW 15 39.04.010.

For limited public works projects, a state agency or authorized 16 17 local government shall solicit electronic or written quotations from a 18 minimum of three contractors from the appropriate small works roster 19 and shall award the contract to the lowest responsible bidder as 20 defined under RCW 39.04.010. After an award is made, the quotations 21 shall be open to public inspection and available by electronic request. 22 A state agency or authorized local government shall attempt to 23 distribute opportunities for limited public works projects equitably among contractors willing to perform in the geographic area of the 24 work. A state agency or authorized local government shall maintain a 25 26 list of the contractors contacted and the contracts awarded during the 27 previous twenty-four months under the limited public works process, including the name of the contractor, the contractor's registration 28 29 number, the amount of the contract, a brief description of the type of 30 work performed, and the date the contract was awarded. For limited public works projects, a state agency or authorized local government 31 32 may waive the payment and performance bond requirements of chapter 39.08 RCW and the retainage requirements of chapter 60.28 RCW, thereby 33 assuming the liability for the contractor's nonpayment of laborers, 34 35 mechanics, subcontractors, materialpersons, suppliers, and taxes 36 imposed under Title 82 RCW that may be due from the contractor for the 37 limited public works project, however the state agency or authorized

local government shall have the right of recovery against the
 contractor for any payments made on the contractor's behalf.

3 (4) The breaking of any project into units or accomplishing any 4 projects by phases is prohibited if it is done for the purpose of 5 avoiding the maximum dollar amount of a contract that may be let using 6 the small works roster process or limited public works process.

7 (5)(a) A state agency or authorized local government may use the 8 limited public works process of subsection (3) of this section to 9 solicit and award small works roster contracts to small businesses that 10 are registered contractors with gross revenues under one million 11 dollars annually as reported on their federal tax return.

(b) A state agency or authorized local government may adopt additional procedures to encourage small businesses that are registered contractors with gross revenues under two hundred fifty thousand dollars annually as reported on their federal tax returns to submit quotations or bids on small works roster contracts.

17 (6) As used in this section, "state agency" means the department of general administration, ((the state parks and recreation commission,)) 18 19 the department of natural resources, the department of ((fish and wildlife)) conservation and recreation, 20 the department of 21 transportation, any institution of higher education as defined under 22 RCW 28B.10.016, and any other state agency delegated authority by the 23 department of general administration to engage in construction, 24 building, renovation, remodeling, alteration, improvement, or repair 25 activities.

26 **Sec. 5005.** RCW 39.04.290 and 2001 c 34 s 1 are each amended to 27 read as follows:

(1) A state agency or local government may award contracts of any 28 29 value for the design, fabrication, and installation of building engineering systems by: (a) Using a competitive bidding process or 30 31 request for proposals process where bidders are required to provide 32 final specifications and a bid price for the design, fabrication, and of building engineering 33 installation systems, with the final 34 specifications being approved by an appropriate design, engineering, 35 and/or public regulatory body; or (b) using a competitive bidding 36 process where bidders are required to provide final specifications for 37 the final design, fabrication, and installation of building engineering

p. 212

4 **Sec. 5014.** RCW 43.81.010 and 1994 c 264 s 27 are each amended to 5 read as follows:

б The legislature recognizes that significant benefits accrue to the 7 state and that certain types of state operations are more efficient when personnel services are available on an extended basis. 8 Such 9 operations include certain types of facilities managed by agencies such 10 as the departments of natural resources, corrections, ((fish and wildlife)) conservation and recreation, social and health services, 11 12 transportation, and veterans affairs((, and the parks and recreation 13 commission)).

The means of assuring that such personnel are available on an extended basis is through the establishment of on-site state-owned or leased living facilities. The legislature also recognizes the restrictions and hardship placed upon those personnel who are required to reside in such state-owned or leased living facilities in order to provide extended personnel services.

The legislature further recognizes that there are instances where it is to the benefit of the state to have state-owned or leased living facilities occupied even though such occupancy is not required by the agency as a condition of employment.

24 **Sec. 5015.** RCW 43.82.010 and 2007 c 506 s 8 are each amended to 25 read as follows:

(1) The director of general administration, on behalf of the agency 26 27 involved and after consultation with the office of financial 28 management, shall purchase, lease, lease purchase, rent, or otherwise 29 acquire all real estate, improved or unimproved, as may be required by 30 elected state officials, institutions, departments, commissions, boards, and other state agencies, or federal agencies where joint state 31 and federal activities are undertaken and may grant easements and 32 33 transfer, exchange, sell, lease, or sublease all or part of any surplus 34 real estate for those state agencies which do not otherwise have the 35 specific authority to dispose of real estate. This section does not

transfer financial liability for the acquired property to the
 department of general administration.

(2) Except for real estate occupied by federal agencies, the 3 director shall determine the location, size, and design of any real 4 estate or improvements thereon acquired or held pursuant to subsection 5 (1) of this section. Facilities acquired or held pursuant to this б 7 chapter, and any improvements thereon, shall conform to standards 8 adopted by the director and approved by the office of financial 9 management governing facility efficiency unless a specific exemption 10 from such standards is provided by the director of general 11 administration. The director of general administration shall report to 12 the office of financial management and the appropriate committees of 13 the legislature annually on any exemptions granted pursuant to this 14 subsection.

15 (3) The director of general administration may fix the terms and conditions of each lease entered into under this chapter, except that 16 17 no lease shall extend greater than twenty years in duration. The 18 director of general administration may enter into a long-term lease 19 greater than ten years in duration upon a determination by the director 20 of the office of financial management that the long-term lease provides 21 a more favorable rate than would otherwise be available, it appears to 22 a substantial certainty that the facility is necessary for use by the 23 state for the full length of the lease term, and the facility meets the 24 standards adopted pursuant to subsection (2) of this section. The director of general administration may enter into a long-term lease 25 26 greater than ten years in duration if an analysis shows that the life-27 cycle cost of leasing the facility is less than the life-cycle cost of 28 purchasing or constructing a facility in lieu of leasing the facility.

29 (4) Except as permitted under chapter 39.94 RCW, no lease for or on 30 behalf of any state agency may be used or referred to as collateral or security for the payment of securities offered for sale through a 31 32 public offering. Except as permitted under chapter 39.94 RCW, no lease for or on behalf of any state agency may be used or referred to as 33 collateral or security for the payment of securities offered for sale 34 35 through a private placement without the prior written approval of the 36 state treasurer. However, this limitation shall not prevent a lessor 37 from assigning or encumbering its interest in a lease as security for

the repayment of a promissory note provided that the transaction would 1 2 otherwise be an exempt transaction under RCW 21.20.320. The state treasurer shall adopt rules that establish the criteria under which any 3 4 such approval may be granted. In establishing such criteria the state 5 treasurer shall give primary consideration to the protection of the б state's credit rating and the integrity of the state's debt management 7 program. If it appears to the state treasurer that any lease has been 8 used or referred to in violation of this subsection or rules adopted 9 under this subsection, then he or she may recommend that the governor 10 cause such lease to be terminated. The department of general administration shall promptly notify the state treasurer whenever it 11 12 may appear to the department that any lease has been used or referred 13 to in violation of this subsection or rules adopted under this 14 subsection.

15 (5) It is the policy of the state to encourage the colocation and 16 consolidation of state services into single or adjacent facilities, 17 whenever appropriate, to improve public service delivery, minimize 18 duplication of facilities, increase efficiency of operations, and 19 promote sound growth management planning.

20 general administration shall provide (6) The director of 21 coordinated long-range planning services to identify and evaluate 22 opportunities for colocating and consolidating state facilities. Upon 23 the renewal of any lease, the inception of a new lease, or the purchase 24 of a facility, the director of general administration shall determine 25 whether an opportunity exists for colocating the agency or agencies in 26 a single facility with other agencies located in the same geographic 27 area. If a colocation opportunity exists, the director of general administration shall consult with the affected state agencies and the 28 29 office of financial management to evaluate the impact colocation would 30 have on the cost and delivery of agency programs, including whether program delivery would be enhanced due to the centralization of 31 32 services. The director of general administration, in consultation with the office of financial management, shall develop procedures for 33 implementing colocation and consolidation of state facilities. 34

35 (7) The director of general administration is authorized to 36 purchase, lease, rent, or otherwise acquire improved or unimproved real 37 estate as owner or lessee and to lease or sublet all or a part of such 38 real estate to state or federal agencies. The director of general administration shall charge each using agency its proportionate rental which shall include an amount sufficient to pay all costs, including, but not limited to, those for utilities, janitorial and accounting services, and sufficient to provide for contingencies; which shall not exceed five percent of the average annual rental, to meet unforeseen expenses incident to management of the real estate.

7 (8) If the director of general administration determines that it is 8 necessary or advisable to undertake any work, construction, alteration, repair, or improvement on any real estate acquired pursuant to 9 subsection (1) or (7) of this section, the director shall cause plans 10 and specifications thereof and an estimate of the cost of such work to 11 12 be made and filed in his or her office and the state agency benefiting 13 thereby is hereby authorized to pay for such work out of any available funds: PROVIDED, That the cost of executing such work shall not exceed 14 15 the sum of twenty-five thousand dollars. Work, construction, alteration, repair, or improvement in excess of twenty-five thousand 16 17 dollars, other than that done by the owner of the property if other 18 than the state, shall be performed in accordance with the public works law of this state. 19

(9) In order to obtain maximum utilization of space, the director 20 21 of general administration shall make space utilization studies, and 22 shall establish standards for use of space by state agencies. Such 23 shall include the identification of opportunities studies for 24 colocation and consolidation of state agency office and support 25 facilities.

26 (10) The director of general administration may construct new 27 buildings on, or improve existing facilities, and furnish and equip, all real estate under his or her management. Prior to the construction 28 of new buildings or major improvements to existing facilities or 29 30 acquisition of facilities using a lease purchase contract, the director of general administration shall conduct an evaluation of the facility 31 32 design and budget using life-cycle cost analysis, value-engineering, and other techniques to maximize the long-term effectiveness and 33 efficiency of the facility or improvement. 34

35 (11) All conveyances and contracts to purchase, lease, rent, 36 transfer, exchange, or sell real estate and to grant and accept 37 easements shall be approved as to form by the attorney general, signed by the director of general administration or the director's designee,
 and recorded with the county auditor of the county in which the
 property is located.

4 (12) The director of general administration may delegate any or all 5 of the functions specified in this section to any agency upon such 6 terms and conditions as the director deems advisable. By January 1st 7 of each year, beginning January 1, 2008, the department shall submit an 8 annual report to the office of financial management and the appropriate 9 committees of the legislature on all delegated leases.

10 (13) This section does not apply to the acquisition of real estate 11 by:

12 (a) The state college and universities for research or experimental13 purposes;

14 (b) The state liquor control board for liquor stores and 15 warehouses; and

16 (c) The department of natural resources, the department of ((fish and wildlife)) conservation and recreation, and the department of transportation((, and the state parks and recreation commission)) for purposes other than the leasing of offices, warehouses, and real estate for similar purposes.

(14) Notwithstanding any provision in this chapter to the contrary, the department of general administration may negotiate ground leases for public lands on which property is to be acquired under a financing contract pursuant to chapter 39.94 RCW under terms approved by the state finance committee.

(15) The department of general administration shall report annually to the office of financial management and the appropriate fiscal committees of the legislature on facility leases executed for all state agencies for the preceding year, lease terms, and annual lease costs. The report must include leases executed under RCW 43.82.045 and subsection (12) of this section.

21 (2) In adopting an open space plan, recognized sources shall be 22 used unless the county does its own survey of important open space 23 priorities or features, or both. Recognized sources include but are not limited to the natural heritage database; the state office of 24 historic preservation; the recreation and conservation office inventory 25 26 of dry accretion beach and shoreline features; state, national, county, 27 or city registers of historic places; the shoreline master program; or 28 studies by ((the parks and recreation commission and by)) the 29 departments of ((fish and wildlife)) conservation and recreation and 30 natural resources. 16 (1) Characteristics of any oil spilled, such as toxicity, 17 dispersibility, solubility, and persistence, that may affect the 18 severity of the effects on the receiving environment, living organisms, 19 and recreational and aesthetic resources;

20 (2) The sensitivity of the affected area as determined by such 21 factors as: (a) The location of the spill; (b) habitat and living 22 resource sensitivity; (c) seasonal distribution or sensitivity of 23 living resources; (d) areas of recreational use or aesthetic importance; (e) the proximity of the spill to important habitats for 24 25 birds, aquatic mammals, fish, or to species listed as threatened or 26 endangered under state or federal law; (f) significant archaeological 27 resources as determined by the department of archaeology and historic preservation; and (g) other areas of special ecological or recreational 28 29 importance, as determined by the department; and

1 Sec. 5025. RCW 90.48.368 and 2007 c 347 s 2 are each amended to
2 read as follows:

(1) The department shall adopt rules establishing a formal process 3 4 for preassessment screening of damages resulting from spills to the waters of the state causing the death of, or injury to, fish, animals, 5 6 vegetation, or other resources of the state. The rules shall specify 7 the conditions under which the department shall convene a preassessment 8 screening committee. The preassessment screening process shall occur 9 concurrently with reconnaissance activities. The committee shall use information obtained from reconnaissance activities as well as any 10 other relevant resource and resource use information. 11 For each 12 incident, the committee shall determine whether a damage assessment 13 investigation should be conducted, or, whether the compensation schedule authorized under RCW 90.48.366 and 90.48.367 should be used to 14 assess damages. The committee may accept restoration or enhancement 15 projects or studies proposed by the liable parties in lieu of some or 16 17 all of: (a) The compensation schedule authorized under RCW 90.48.366 and 90.48.367; or (b) the claims from damage assessment studies 18 authorized under RCW 90.48.142. 19

20 preassessment screening committee (2) А may consist of 21 representatives of the departments of ecology, archaeology and historic 22 preservation, ((fish and wildlife)) conservation and recreation, 23 and natural resources, ((and the parks and recreation health, 24 commission,)) as well as other federal, state, and local agencies, and 25 tribal and local governments whose presence would enhance the 26 reconnaissance or damage assessment aspects of spill response. The 27 department shall chair the committee and determine which representatives will be needed on a spill-by-spill basis. 28

29 The committee shall consider the following factors when (3) 30 determining whether a damage assessment study authorized under RCW should conducted: (a) Whether 31 90.48.367 be evidence from reconnaissance investigations suggests that injury has occurred or is 32 33 likely to occur to publicly owned resources; (b) the potential loss in services provided by resources injured or likely to be injured and the 34 35 expected value of the potential loss; (c) whether a restoration project 36 to return lost services is technically feasible; (d) the accuracy of 37 damage quantification methods that could be used and the anticipated cost-effectiveness of applying each method; (e) the extent to which 38

1 likely injury to resources can be verified with available 2 quantification methods; and (f) whether the injury, once quantified, 3 can be translated into monetary values with sufficient precision or 4 accuracy.

5 (4) When a resource damage assessment is required for an oil spill 6 in the waters of the state, as defined in RCW 90.56.010, the state 7 trustee agency responsible for the resource and habitat damaged shall 8 conduct the damage assessment and pursue all appropriate remedies with 9 the responsible party.

10 (5) Oil spill damage assessment studies authorized under RCW 90.48.367 may only be conducted if the committee, after considering the 11 12 factors enumerated in subsection (3) of this section, determines that 13 the damages to be investigated are quantifiable at a reasonable cost 14 that proposed assessment studies clearly and are linked to quantification of the damages incurred. 15

16 (6) As new information becomes available, the committee may 17 reevaluate the scope of damage assessment using the factors listed in 18 subsection (3) of this section and may reduce or expand the scope of 19 damage assessment as appropriate.

(7) The preassessment screening process shall provide for the ongoing involvement of persons who may be liable for damages resulting from an oil spill. The department may negotiate with a potentially liable party to perform restoration and enhancement projects or studies which may substitute for all or part of the compensation authorized under RCW 90.48.366 and 90.48.367 or the damage assessment studies authorized under RCW 90.48.367.

(8) For the purposes of this section and RCW 90.48.367, the cost of a damage assessment shall be considered "reasonable" when the anticipated cost of the damage assessment is expected to be less than the anticipated damage that may have occurred or may occur.

SUBPART A

MERGING THE POLLUTION LIABILITY INSURANCE PROGRAM INTO THE DEPARTMENT OF ECOLOGY

10 **Sec. 7001.** RCW 70.148.005 and 1990 c 64 s 1 are each amended to 11 read as follows:

12 (1) The legislature finds that:

(a) Final regulations adopted by the United States environmental protection agency (EPA) require owners and operators of underground petroleum storage tanks to demonstrate financial responsibility for accidental releases of petroleum as a precondition to continued ownership and operation of such tanks;

(b) Financial responsibility is demonstrated through the purchase of pollution liability insurance or an acceptable alternative such as coverage under a state financial responsibility program, in the amount of at least five hundred thousand dollars per occurrence and one million dollars annual aggregate depending upon the nature, use, and number of tanks owned or operated;

(c) Many owners and operators of underground petroleum storage tanks cannot purchase pollution liability insurance either because private insurance is unavailable at any price or because owners and operators cannot meet the rigid underwriting standards of existing insurers, nor can many owners and operators meet the strict regulatory standards imposed for alternatives to the purchase of insurance; and

30 (d) Without a state financial responsibility program for owners and 31 operators of underground petroleum storage tanks, many tank owners and 32 operators will be forced to discontinue the ownership and operation of 33 these tanks.

34 (2) The purpose of this chapter is to create a state financial

1 responsibility program meeting EPA standards for owners and operators 2 of underground petroleum storage tanks in a manner that:

3 (a) Minimizes state involvement in pollution liability claims
4 management and insurance administration;

5 (b) Protects the state of Washington from unwanted and 6 unanticipated liability for accidental release claims;

7 (c) Creates incentives for private insurers to provide needed8 liability insurance; and

9 (d) Parallels generally accepted principles of insurance and risk 10 management.

11 To that end, this chapter establishes a temporary program to 12 provide pollution liability reinsurance at a price that will encourage 13 a private insurance company or risk retention group to sell pollution 14 liability insurance in accordance with the requirements of this chapter 15 to owners and operators of underground petroleum storage tanks, thereby 16 allowing the owners and operators to comply with the financial 17 responsibility regulations of the EPA.

(3) It is not the intent of this chapter to permit owners and 18 19 operators of underground petroleum storage tanks to obtain pollution 20 liability insurance without regard to the quality or condition of their 21 storage tanks or without regard to the risk management practices of 22 tank owners and operators, nor is it the intent of this chapter to 23 provide coverage or funding for past or existing petroleum releases. 24 Further, it is the intent of the legislature that the program follow 25 generally accepted insurance underwriting and actuarial principles and 26 to deviate from those principles only to the extent necessary and 27 within the tax revenue limits provided, to make pollution liability 28 insurance reasonably affordable and available to owners and operators 29 who meet the requirements of this chapter, particularly to those owners 30 and operators whose underground storage tanks meet a vital economic need within the affected community. 31

32 (4) The pollution liability insurance program established by this
 33 chapter and chapter 70.149 RCW is merged into the department.

34

(5) This section expires June 1, 2013.

1 **Sec. 7010.** RCW 70.148.070 and 1990 c 64 s 8 are each amended to 2 read as follows:

3 (1) In selecting an insurer to provide pollution liability 4 insurance coverage to owners and operators of underground storage 5 tanks, the ((director)) department shall evaluate bids based upon 6 criteria established by the ((director)) department that shall include:

7 (a) The insurer's ability to underwrite pollution liability
8 insurance;

9 (b) The insurer's ability to settle pollution liability claims 10 quickly and efficiently;

11 (c) The insurer's estimate of underwriting and claims adjustment 12 expenses;

13 (d) The insurer's estimate of premium rates for providing coverage;

14 (e) The insurer's ability to manage and invest premiums; and

15 (f) The insurer's ability to provide risk management guidance to 16 insureds.

The ((director)) department shall select the bidder most qualified to provide insurance consistent with this chapter and need not select the bidder submitting the least expensive bid. The ((director)) department may consider bids by groups of insurers and management companies who propose to act in concert in providing coverage and who otherwise meet the requirements of this chapter.

(2) The successful bidder shall agree to provide liability insurance coverage to owners and operators of underground storage tanks for third party bodily injury and property damage and corrective action consistent with the following minimum standards:

27

(a) The insurer shall provide coverage for defense costs.

(b) The insurer shall collect a deductible from the insured for
 corrective action in an amount approved by the ((director)) department.

30 (c) The insurer shall provide coverage for accidental releases in 31 the amount of five hundred thousand dollars per occurrence and one 32 million dollars annual aggregate but no more than one million dollars 33 per occurrence and two million dollars annual aggregate exclusive of 34 defense costs.

35 (d) The insurer shall require insurance applicants to meet at least 36 the following underwriting standards before issuing coverage to the 37 applicant: (i) The applicant must be in compliance with statutes, ordinances,
 rules, regulations, and orders governing the ownership and operation of
 underground storage tanks as identified by the ((director)) department
 by rule; and

5 (ii) The applicant must exercise adequate underground storage tank
6 risk management as specified by the ((director)) department by rule.

7 (e) The insurer may exclude coverage for losses arising before the 8 effective date of coverage, and the ((director)) <u>department</u> may adopt 9 rules establishing standards for determining whether a loss was 10 incurred before the effective date of coverage.

(f) The insurer may exclude coverage for bodily injury, property damage, and corrective action as permitted by the ((director)) department by rule.

(g) The insurer shall use a variable rate schedule approved by the ((director)) department taking into account tank type, tank age, and other factors specified by the ((director)) department.

17 (3) The ((director)) department shall adopt all rules necessary to 18 implement this section. In developing and adopting rules governing 19 rates, deductibles, underwriting standards, and coverage conditions, limitations, and exclusions, the ((director)) department shall balance 20 21 the owner and operator's need for coverage with the need to maintain 22 the actuarial integrity of the program, shall take into consideration 23 the economic impact of the discontinued use of a storage tank upon the 24 affected community, and shall consult with the ((standing)) ad hoc 25 technical advisory committee established under RCW 70.148.030(3). ((In 26 developing and adopting rules governing coverage exclusions affecting 27 corrective action, the director shall consult with the Washington state department of ecology.)) 28

37 (5) Owners and operators of underground storage tanks or sites38 containing underground storage tanks where a preexisting release has

been identified or where the owner or operator knows of a preexisting release are eligible for coverage under the program subject to the following conditions:

4 (a) The owner or operator must have a plan for proceeding with 5 corrective action; and

6 (b) If the owner or operator files a claim with the insurer, the 7 owner or operator has the burden of proving that the claim is not 8 related to a preexisting release until the owner or operator 9 demonstrates to the satisfaction of the ((director)) department that 10 corrective action has been completed.

11 (6) ((When)) Within thirty days of a reinsurance contract ((has 12 been)) being entered into by the ((agency)) department and insurance 13 companies, ((the director shall notify the department of ecology of the 14 letting of the contract. Within thirty days of that notification,)) the department ((of ecology)) shall notify all known owners and 15 operators of petroleum underground storage tanks that appropriate 16 levels of financial responsibility must be established by October 26, 17 1990, in accordance with federal environmental protection agency 18 19 requirements, and that insurance under the program is available. All owners and operators of petroleum underground storage tanks must also 20 21 be notified that declaration of method of financial responsibility or 22 intent to seek to be insured under the program must be made to the 23 state by November 1, 1990. If the declaration of method of financial 24 responsibility is not made by November 1, 1990, the department ((of 25 ecology)) shall, pursuant to chapter 90.76 RCW, prohibit the owner or 26 operator of an underground storage tank from obtaining a tank tag or 27 receiving petroleum products until such time as financial 28 responsibility has been established.

SUBPART B RECLAIMED WATER PROGRAM

6 **Sec. 7027.** RCW 90.46.005 and 2007 c 445 s 2 are each amended to 7 read as follows:

8 The legislature finds that by encouraging the use of reclaimed 9 water while assuring the health and safety of all Washington citizens 10 and the protection of its environment, the state of Washington will 11 continue to use water in the best interests of present and future 12 generations.

To facilitate the immediate use of reclaimed water for uses 13 approved by the department((s)) of ecology ((and health)), the state 14 15 shall expand both direct financial support and financial incentives for capital investments in water reuse and reclaimed water to effectuate 16 the goals of this chapter. The legislature further directs ((the 17 department of health and)) the department of ecology to ((coordinate 18 19 efforts towards developing)) develop an efficient and streamlined 20 process for creating and implementing processes for the use of 21 reclaimed water.

It is hereby declared that the people of the state of Washington have a primary interest in the development of facilities to provide reclaimed water to replace potable water in nonpotable applications, to supplement existing surface and ground water supplies, and to assist in meeting the future water requirements of the state.

The legislature further finds and declares that the utilization of 27 28 reclaimed water by local communities for domestic, agricultural, industrial, recreational, and fish and wildlife habitat creation and 29 30 enhancement purposes, including wetland enhancement, will contribute to the peace, health, safety, and welfare of the people of the state of 31 32 Washington. To the extent reclaimed water is appropriate for beneficial uses, it should be so used to preserve potable water for 33 34 drinking purposes, contribute to the restoration and protection of 35 instream flows that are crucial to preservation of the state's salmonid 36 fishery resources, contribute to the restoration of Puget Sound by

reducing wastewater discharge, provide a drought resistant source of 1 water supply for nonpotable needs, or be a source of supply integrated 2 into state, regional, and local strategies to respond to population 3 4 growth and global warming. Use of reclaimed water constitutes the development of new basic water supplies needed for future generations 5 and local and regional water management planning should consider б coordination of infrastructure, development, storage, water reclamation 7 8 and reuse, and source exchange as strategies to meet water demands 9 associated with population growth and impacts of global warming.

10 The legislature further finds and declares that the use of 11 reclaimed water is not inconsistent with the policy of antidegradation 12 of state waters announced in other state statutes, including the water 13 pollution control act, chapter 90.48 RCW and the water resources act, 14 chapter 90.54 RCW.

The legislature finds that other states, including California, Florida, and Arizona, have successfully used reclaimed water to supplement existing water supplies without threatening existing resources or public health.

19 It is the intent of the legislature that the department of ecology 20 ((and the department of health)) undertake the necessary steps to 21 encourage the development of water reclamation facilities so that 22 reclaimed water may be made available to help meet the growing water 23 requirements of the state.

24 The legislature further finds and declares that reclaimed water facilities are water pollution control facilities as defined in chapter 25 26 70.146 RCW and are eligible for financial assistance as provided in 27 chapter 70.146 RCW. The legislature finds that funding demonstration projects will ensure the future use of reclaimed water. 28 ((The demonstration projects in RCW 90.46.110 are varied in nature and will 29 30 provide the experience necessary to test different facets of the standards and refine a variety of technologies so that water purveyors 31 32 can begin to use reclaimed water technology in a more cost effective 33 This is especially critical in smaller cities and manner.)) communities where the feasibility for such projects is great, but there 34 35 are scarce resources to develop the necessary facilities.

The legislature further finds that the agricultural processing industry can play a critical and beneficial role in promoting the

p. 308

efficient use of water by having the opportunity to develop and reuse
 agricultural industrial process water from food processing.

3 **Sec. 7028.** RCW 90.46.010 and 2009 c 456 s 1 are each amended to 4 read as follows:

5 The definitions in this section apply throughout this chapter 6 unless the context clearly requires otherwise.

7 (1) "Agricultural industrial process water" means water that has
8 been used for the purpose of agricultural processing and has been
9 adequately and reliably treated, so that as a result of that treatment,
10 it is suitable for other agricultural water use.

13 Sec. 7029. RCW 90.46.015 and 2009 c 456 s 2 are each amended to 14 read as follows:

(1) The department ((of ecology)) shall((, in coordination with the 15 16 department of health,)) adopt rules for reclaimed water use consistent 17 with this chapter. The rules must address all aspects of reclaimed 18 water use, including commercial and industrial uses, land applications, direct groundwater recharge, wetland discharge, surface percolation, 19 20 constructed wetlands, and streamflow or surface water augmentation. 21 The department of health shall, in coordination with the department 22 ((of ecology)), adopt rules for greywater reuse. ((The rules must also 23 designate whether the department of ecology or the department of health will be the lead agency responsible for a particular aspect of 24 25 reclaimed water use.)) In developing the rules, the ((departments of 26 health and ecology)) department shall amend or rescind any existing rules on reclaimed water in conflict with the new rules. 27

(2) All rules required to be adopted pursuant to this section must
 be completed no later than December 31, 2010, although the department
 ((of ecology)) is encouraged to adopt the final rules as soon as
 possible.

32 (3) The department ((of ecology)) must consult with the advisory 33 committee created under RCW 90.46.050 in all aspects of rule 34 development required under this section.

35 **Sec. 7030.** RCW 90.46.030 and 2006 c 279 s 5 are each amended to 36 read as follows: 1 (1)(((a) The department of health shall, in coordination with the 2 department of ecology, adopt a single set of standards, procedures, and 3 guidelines on or before August 1, 1993, for the industrial and 4 commercial use of reclaimed water.

5 (b) Standards adopted under this section are superseded by any 6 rules adopted by the department of ecology pursuant to RCW 90.46.015 as 7 they relate to the industrial and commercial use of reclaimed water.

8 (2) Unless)) The department ((of ecology adopts)) may adopt rules pursuant to RCW 90.46.015 that relate to the industrial and commercial 9 10 use of reclaimed water ((specifying otherwise,)). The department ((of health)) may issue a reclaimed water permit for industrial and 11 12 commercial uses of reclaimed water to the generator of reclaimed water 13 who may then distribute the water, subject to provisions in the permit 14 governing the location, rate, water quality, and purposes of use. 15 Permits issued after the adoption of rules under RCW 90.46.015 must be consistent with the adopted rules. 16

17 (((3))) (2) The department ((of health)) in consultation with the 18 advisory committee established in RCW 90.46.050, shall develop 19 recommendations for a fee structure for permits issued under ((subsection (2) of)) this ((section)) chapter. Fees 20 shall be 21 established in amounts to fully recover, and not exceed, expenses 22 incurred by the department ((of health)) in processing permit 23 applications and modifications, monitoring and evaluating compliance 24 with permits, and conducting inspections and supporting the reasonable 25 overhead expenses that are directly related to these activities. 26 Permit fees may not be used for research or enforcement activities. 27 ((The department of health shall not issue permits under this section until a fee structure has been established. 28

Nothing in 5 this section limits the powers of the state or any political 6 subdivision to exercise such authority.

7 (((6) Unless the department of ecology adopts rules pursuant to RCW 8 90.46.015 that relate to the industrial and commercial use of reclaimed water specifying otherwise, the department of health may implement the 9 10 requirements of this section through the department of ecology by 11 execution of a formal agreement between the departments. Upon execution of such an agreement, the department of ecology may issue 12 13 reclaimed water permits for industrial and commercial uses of reclaimed water by issuance of permits under chapter 90.48 RCW, and may establish 14 15 and collect fees as required for permits issued under chapter 90.48 16 RCW.

5 (1) Reclaimed water may be beneficially used for discharge into 6 constructed beneficial use wetlands and constructed treatment wetlands 7 provided the reclaimed water meets the class A or B reclaimed water 8 standards as defined in the reclamation criteria, and the discharge is 9 incorporated into a sewer or water comprehensive plan, as applicable, 10 adopted by the applicable local government and approved by the 11 department of health or department of ecology as applicable.

12 (2) Reclaimed water that does not meet the class A or B reclaimed 13 water standards may be beneficially used for discharge into constructed 14 treatment wetlands where the department ((of ecology, in consultation 15 with the department of health,)) has specifically authorized such use 16 at such lower standards.

17 (3)(a) The department ((of ecology and the department of health)) 18 must develop appropriate standards for discharging reclaimed water into 19 constructed beneficial use wetlands and constructed treatment wetlands. 20 These standards must be considered as part of the approval process 21 under subsections (1) and (2) of this section.

(b) Standards adopted under this section are superseded by any rules adopted by the department ((of ecology)) pursuant to RCW 90.46.015 as they relate to discharge into constructed beneficial use wetlands and constructed treatment wetlands.

26 **Sec. 7033.** RCW 90.46.120 and 2009 c 456 s 5 are each amended to 27 read as follows:

28 (1) The owner of a wastewater treatment facility that is reclaiming water with a permit issued under this chapter has the exclusive right 29 30 to any reclaimed water generated by the wastewater treatment facility. Use, distribution, storage, and the recovery from storage of reclaimed 31 32 water permitted under this chapter is exempt from the permit 33 requirements of RCW 90.03.250 and 90.44.060, provided that a permit for 34 recovery of reclaimed water from aquifer storage shall be reviewed 35 under the standards established under RCW 90.03.370(2) for aquifer storage and recovery projects. Revenues derived from the reclaimed 36

p. 314

1 water facility shall be used only to offset the cost of operation of 2 the wastewater utility fund or other applicable source of systemwide 3 funding.

(2) If the proposed use of reclaimed water is to augment or replace
potable water supplies or to create the potential for the development
of an additional new potable water supply, then regional water supply
plans, or any other potable water supply plans prepared by multiple
water purveyors, must consider the proposed use of the reclaimed water
as they are developed or updated.

10 (a) Regional water supply plans include those adopted under state 11 board of health laws (chapter 43.20 RCW), the public water system 12 coordination act of 1977 (chapter 70.116 RCW), groundwater protection 13 laws (chapter 90.44 RCW), and the watershed planning act (chapter 90.82 14 RCW).

(b) The requirement to consider the use of reclaimed water does notchange the plan approval process established under these statutes.

17 (c) When regional water supply plans are being developed, the 18 owners of wastewater treatment facilities that produce or propose to 19 produce reclaimed water for use within the planning area must be 20 included in the planning process.

(3) When reclaimed water is available or is proposed for use under a water supply or wastewater plan developed under chapter 43.20, 70.116, 90.44, 90.48, or 90.82 RCW these plans must be coordinated to ensure that opportunities for reclaimed water are evaluated. The requirements of this subsection (3) do not apply to water system plans developed under chapter 43.20 RCW for utilities serving less than one thousand service connections.

(4) The provisions of any plan for reclaimed water, developed under the authorities in subsections (2) and (3) of this section, should be included by a city, town, or county in reviewing provisions for water supplies in a proposed short plat, short subdivision, or subdivision under chapter 58.17 RCW, where reclaimed water supplies may be proposed for nonpotable purposes in the short plat, short subdivision, or subdivision.

35 (((5) By November 30, 2009, the department of ecology shall review 36 comments from the reclaimed water advisory committee under RCW 37 90.46.050 and the reclaimed water and water rights advisory committee 38 under the direction of the department of ecology and submit a recommendation to the legislature on the impairment requirements and standards for reclaimed water. The department of ecology shall also provide a report to the legislature that describes the opinions of the stakeholders on the impairment requirements and standards for reclaimed water.))

6 **Sec. 7034.** RCW 90.46.150 and 2001 c 69 s 3 are each amended to 7 read as follows:

The permit to apply agricultural industrial process water to 8 9 agricultural water use shall be the permit issued under chapter 90.48 RCW to the owner of the agricultural processing plant who may then 10 11 distribute the water through methods including, but not limited to, 12 irrigation systems, subject to provisions in the permit governing the 13 location, rate, water quality, and purpose. ((In cases where the department of ecology determines that a significant risk to public 14 15 health exists, in land application of the water, the department must 16 refer the application to the department of health for review and 17 consultation.))

The owner of the agricultural processing plant who obtains a permit under this section has the exclusive right to the use of any agricultural industrial process water generated from the plant and to the distribution of such water through facilities including irrigation systems. Use and distribution of the water by the owner is exempt from the permit requirements of RCW 90.03.250, 90.03.380, 90.44.060, and 90.44.100.

Nothing in chapter 69, Laws of 2001 shall be construed to affect any right to reuse agricultural industrial discharge water in existence on or before July 22, 2001.

28 **Sec. 7035.** RCW 90.46.160 and 2002 c 329 s 6 are each amended to 29 read as follows:

(1) The permit to use industrial reuse water shall be the permit issued under chapter 90.48 RCW to the owner of the plant that is the source of the industrial process water, who may then distribute the water according to provisions in the permit governing the location, rate, water quality, and purpose. ((In cases where the department of ecology determines that a proposed use may pose a significant risk to public health, the department shall refer the permit application to the department of health for review and consultation.))

(2) The owner of the industrial plant who obtains a permit under
this section has the exclusive right to the use of any industrial reuse
water generated from the plant and to the distribution of such water.
Use and distribution of the water by the owner is exempt from the
permit requirements of RCW 90.03.250, 90.03.380, 90.44.060, and
90.44.100.

9 (3) Nothing in this section affects any right to reuse industrial 10 process water in existence on or before June 13, 2002.

11 **Sec. 7036.** RCW 90.46.200 and 2009 c 456 s 7 are each amended to 12 read as follows:

(1) ((The department of ecology and the department of health shall have authority to carry out all the provisions of this chapter including, but not limited to, permitting and enforcement. Only the department of ecology or the department of health may act as a lead agency for purposes of this chapter and will be established as such by rule. Enforcement of a permit issued under this chapter shall be at the sole discretion of the lead agency that issued the permit.

20 (2) All permit applications shall be referred to the nonlead agency
21 for review and consultation. The nonlead agency may choose to limit
22 the scope of its review.

23 (3)) The department shall consult with the department of health in 24 cases where a proposed use of reclaimed water may pose a significant 25 risk to public health.

26 (2) The authority and duties created in this chapter are in 27 addition to any authority and duties already provided in law. Nothing 28 in this chapter limits the powers of the state or any political 29 subdivision to exercise such authority.

The ((lead agency)) department, with the assistance of the attorney general, is authorized to bring any appropriate action at law or in equity, including action for injunctive relief, as may be necessary to carry out the provisions of this chapter. The ((lead agency)) department may bring the action in the superior court of the county in which the violation occurred or in the superior court of Thurston county. The court may award reasonable attorneys' fees for the cost of the attorney general's office in representing the ((lead agency)) <u>department</u>.

5 **Sec. 7038.** RCW 90.46.220 and 2009 c 456 s 9 are each amended to read as follows:

7 (1) Any person proposing to generate any type of reclaimed water 8 for a use regulated under this chapter shall obtain a permit from the 9 ((lead agency)) department prior to distribution or use of that water. 10 The permittee may then distribute and use the water, subject to the 11 provisions in the permit. The permit must include provisions that 12 protect human health and the environment. At a minimum, the permit 13 must:

14

(a) Assure adequate and reliable treatment; and

15 (b) Govern the water quality, location, rate, and purpose of use.

16 (2) A permit under this chapter may be issued only to:

17 (a) A municipal, quasi-municipal, or other governmental entity;

(d) The owner of an agricultural processing facility that is generating agricultural industrial process water for agricultural use, or the owner of an industrial facility that is generating industrial process water for reuse.

(3) Before deciding whether to issue a permit under this section to a private utility, the ((lead agency)) department may require information that is reasonable and necessary to determine whether the private utility has the financial and other resources to ensure the reliability, continuity, and supervision of the reclaimed water facility.

(4) Permits shall be issued for a fixed term specified by the rules adopted under RCW 90.46.015. A permittee shall apply for permit renewal prior to the end of the term. The rules adopted under RCW 90.46.015 shall specify the process of renewal, modification, change of ownership, suspension, and termination.

36 (5) The ((lead agency)) <u>department</u> may deny an application for a 37 permit or modify, suspend, or revoke a permit for good cause, including

(6) The ((lead agency)) <u>department</u> shall provide for adequate 5 б public notice and opportunity for review and comment on all initial 7 permit applications and renewal applications. Methods for providing notice may include electronic mail, posting on the ((lead agency's)) 8 department's internet site, publication in a local newspaper, press 9 10 releases, mailings, or other means of notification the ((lead agency)) 11 department determines appropriate. The ((lead agency)) <u>department</u> 12 shall also publicize notice of final permitting decisions.

13 (7) Any person aggrieved by a permitting decision has the right to 14 an adjudicative proceeding. An adjudicative proceeding conducted under 15 this subsection is governed by chapter 34.05 RCW. (8) Permit requirements for the distribution and use of greywater
 will be established in rules adopted by the department of health under
 RCW 90.46.015.

28 **Sec. 7039.** RCW 90.46.230 and 2009 c 456 s 10 are each amended to 29 read as follows:

(1)(a) Except as otherwise provided in (b) of this subsection, the ((lead agency)) department or its designee shall have the right to enter and inspect any property related to the purpose of the permit, public or private, at reasonable times with prior notification in order to determine compliance with laws and rules administered by the ((lead agency)) department. During such inspections, the ((lead agency)) department shall have free and unimpeded access to all data, facilities, and property involved in the generation, distribution, and
 use of reclaimed water.

3 (b) The ((lead agency)) <u>department</u> or its designee need not give 4 prior notification to enter property under (a) of this subsection if 5 the purpose of the entry is to ensure compliance by the permittee with 6 a prior order of the ((lead agency)) <u>department</u> or if the ((lead 7 agency)) <u>department</u> or its designee has reasonable cause to believe 8 there is a violation of the law that poses a serious threat to public 9 health and safety or the environment.

10 (2) The ((lead agency)) <u>department</u> or its designee may apply for an 11 administrative search warrant to a court of competent jurisdiction and 12 an administrative search warrant may issue where:

13 (a) The ((lead agency)) <u>department</u> has attempted an inspection 14 under this chapter and access has been actually or constructively 15 denied; or

(1) "High-level radioactive waste" means "high-level radioactive
 waste" as the term is defined in 42 U.S.C. Sec. 10101 (P.L. 97-425).

"Low-level radioactive waste" means waste material that 1 (2) contains radioactive nuclides emitting primarily beta or 2 gamma 3 radiation, or both, in concentrations or quantities that exceed applicable federal or state standards for unrestricted release. 4 Lowlevel waste does not include waste containing more than one hundred 5 nanocuries of transuranic contaminants per gram of material, nor spent 6 7 nuclear fuel, nor material classified as either high-level radioactive 8 waste or waste that is unsuited for disposal by near-surface burial under any applicable federal regulations. 9

10 (3) "Radioactive waste" means both high-level and low-level 11 radioactive waste.

12 (4) "Spent nuclear fuel" means spent nuclear fuel as the term is13 defined in 42 U.S.C. Sec. 10101.

14 (5) "Department" means the department of ecology.

(6) "Commercial low-level radioactive waste disposal facility" has
 the same meaning as "facility" as defined in RCW 43.145.010.

(2) To assume the responsibilities of the state under the perpetual care agreement between the state of Washington and the federal government executed July 29, 1965, and the sublease between the state of Washington and the site operator of the ((Hanford)) commercial lowlevel radioactive waste disposal facility. In order to finance perpetual surveillance and maintenance under the agreement and ensure site closure under the sublease, the department of ecology shall impose

and collect fees from parties holding radioactive materials for waste 1 2 management purposes. The fees shall be established by rule adopted under chapter 34.05 RCW and shall be an amount determined by the 3 4 department of ecology to be necessary to defray the estimated liability of the state. Such fees shall reflect equity between the disposal 5 6 facilities of this and other states. The perpetual surveillance and maintenance account shall be 22 used exclusively by the state to meet post-closure surveillance and 23 maintenance costs, or for otherwise satisfying surveillance and maintenance obligations. Appropriations are required to permit 24 expenditures and payment of obligations from the site closure account 25 26 and the perpetual surveillance and maintenance account. ((All moneys, 27 including earnings from the investment of balances in the site closure and the perpetual surveillance and maintenance account, less the 28 allocation to the state treasurer's service fund, pursuant to RCW 29 43.08.190 accruing under the authority of this section shall be 30 directed to the site closure account until December 31, 1992. 31 32 Thereafter receipts including earnings from the investment of balances 33 in the site closure and the perpetual surveillance and maintenance account, less the allocation to the state treasurer's service fund, 34 35 pursuant to RCW 43.08.190)) Receipts shall be directed to the site 36 closure account and the perpetual surveillance and maintenance account 37 as specified by the department. If agreement cannot be reached between the state department of ecology and the 20 21 United States department of energy by June 1, 2008, the treasurer shall 22 transfer the funds from the general fund to the site closure account 23 according to the schedule in (a) of this subsection.

24 If for any reason the ((Hanford)) commercial low-level (C) 25 radioactive waste disposal facility is closed to further disposal 26 operations during or after the 2003-2005 biennium and before 2033, then 27 the amount remaining to be repaid from the 2003-2005 transfer of 28 thirteen million eight hundred thousand dollars from the site closure 29 account shall be transferred by the treasurer from the general fund to 30 the site closure account to fund the closure and decommissioning of the The treasurer shall transfer to the site closure account in 31 facility. 32 full the amount remaining to be repaid upon written notice from the secretary of health that the department of health has authorized 33 closure or that disposal operations have ceased.
