2 (a) and 66.0901 (1m) (b); and *to create* 16.754 (2) (b) and 66.0901 (10) of the
3 statutes; **relating to:** preference in state and local government contracts and
4 procurement for materials manufactured in the United States.

Analysis by the Legislative Reference Bureau

Current law generally authorizes the Department of Administration to purchase, or delegate the authority to purchase, all necessary materials and contractual services for all state agencies. With some exceptions, orders or contracts must be awarded to the lowest bidder. One such exception requires the purchasing agent, if all other factors are substantially equal, to purchase materials that are mined, produced, manufactured, fabricated, or assembled to the greatest extent in the United States.

Under this bill, with limited exceptions, the state must purchase materials that are manufactured in the United States to the greatest extent, regardless of whether all other factors are substantially equal. The bill also requires, with limited exceptions, that a state contract for a public works or public improvement project contain a provision requiring the contractor to use materials that are manufactured in the United States.

Generally, under current law, if a city, village, town, county, school district, sewer district, technical college district, or other local unit of government wishes to

let a public contract involving the construction or repair of any public work or building, or the furnishing of supplies or materials, there are a number of bidding requirements that apply. Under the bill, these public contracts must also contain a provision that the contractor will use materials that are manufactured in the United States in the performance of the contract.

The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:

1 **SECTION 1.** 16.754 (2) of the statutes is renumbered 16.754 (2) (a) and amended
