Analysis by the Legislative Reference Bureau

This bill establishes requirements for third-party food delivery services that operate digital networks and deliver food purchased from restaurants through digital networks. Specifically, the bill establishes three requirements:

1. That third-party food delivery services provide a publicly accessible process for a restaurant to request its removal from the digital network of a third-party food delivery service. Third-party food delivery services must remove a requesting restaurant from its digital network within three business days of the request. Also, third-party food delivery services may not solicit requests from consumers that a restaurant be added to the digital network of a third-party food delivery service.

2. That third-party food delivery services ensure that individuals delivering food for the third-party food delivery service have knowledge of basic food safety principles, including personal hygiene and avoiding cross contamination.

3. That third-party food delivery services provide to an owner or operator of a restaurant the contents of orders placed from the restaurant with the third-party food delivery service and the times that orders are placed.
