ASSEMBLY BILL 742

- 1 78.94 and 168.05 (6) of the statutes; **relating to:** fuel products fees and
2 inspection (suggested as remedial legislation by the Department of Commerce).
-

Analysis by the Legislative Reference Bureau

Under current law, the Department of Commerce (Commerce) prescribes standards for gasoline and similar fuels and administers laws regulating the inspection and sale of those fuels and other petroleum products. Current law also requires certain suppliers who receive petroleum products for sale in this state to pay a petroleum inspection fee. The Department of Revenue (DOR) administers the laws that relate to this fee. This bill reorganizes the statutes so that the petroleum inspection fee statutes are placed with other statutes that relate to vehicle fuel taxes and that are also administered by DOR. The bill also does the following:

1. Changes the term “petroleum products” to “fuel products” to more accurately describe the products covered under the laws administered by Commerce and DOR.
2. Clarifies that with regard to requirements for fuel product inspection, an inspector is not required to take a sample of every fuel product that is received in this state, and that the inspector may discard the sample seven or more days after taking the sample.
3. Authorizes Commerce to determine what constitutes a reasonable length of time in which an inspector may take a sample of a fuel product rather than requiring that the sample be taken during a specified time as required under current law.
4. Eliminates a requirement that a recipient of fuel products submit an application to Commerce if the recipient wants to unload the fuel products before inspection.
5. Clarifies that the requirements for inspection of fuel products do not apply to fuel products that are used in this state but that are not sold or offered for sale in this state.
6. Authorizes, rather than requires as under current law, an inspector to inspect fuel product samples to determine whether the samples meet minimum specifications prescribed by Commerce and eliminates the requirement that the inspector issue an inspection certificate.
7. Authorizes an inspector to enter the premises of a distributor of fuel products. Under current law, an inspector may enter only the premises of a manufacturer, vendor, dealer, or user of fuel products.
8. Requires that fuel product dispensing devices be marked or labeled in a conspicuous place with the octane rating, if any, of the fuel product being dispensed. Current law requires these devices to be marked only with the name and grade of the fuel product being dispensed.
9. Revises the testing method for determining the flash point of certain fuel products.
10. Establishes flash point and flammability standards for fuel products that are delivered, placed, or stored in a portable container and that are used in turbine

ASSEMBLY BILL 742

engines. The standards are the same as those that apply under current law to such fuel products used in spark-ignition internal combustion engines.

11. Revises the exemptions to standards for delivering, placing, or storing fuel products in containers. The bill exempts fuel products in stationary tanks of 110 gallons capacity or more. Current law exempts containers of 275 gallons or more.

For further information, see the NOTES provided by the Law Revision Committee of the Joint Legislative Council.

The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:
