3 (1) (d) 18. and 149.14 (3) (nm); and *to create* subchapter IV of chapter 50
4 [precedes 50.60] of the statutes; **relating to:** ambulatory surgical facilities.

Analysis by the Legislative Reference Bureau

Under current law, a hospital must be licensed by the Department of Health Services (DHS) to operate in this state. An ambulatory surgical center is not required to be licensed to operate in this state, but must be approved by the federal Department of Health and Human Services to receive reimbursement under the federal Medicare program. An ambulatory surgical center is a distinct entity that operates exclusively for the purpose of providing surgical services to patients not requiring hospitalization.

This bill creates a licensing requirement for ambulatory surgical facilities (ASFs), which are defined as places where major regional anesthesia, general anesthesia, or moderate or deep sedation is produced in humans. The ASF licensing requirement applies to health care facilities and health care provider offices, except that hospitals, outpatient facilities operated by a hospital, and dentist's offices are exempt from the licensing requirement. Under the bill, a facility or provider office is eligible for an ASF license if it is approved as an ambulatory surgical center for purposes of Medicare or is accredited by a national accrediting body. The bill requires that if a person dies as a result of a complication in the administration of an anesthetic or sedative at an ASF, the ASF must report the death to the examining

board responsible for accrediting the physician or nurse anesthetist that administered the anesthetic or sedative.

For further information see the *state* fiscal estimate, which will be printed as an appendix to this bill.
