### ***Analysis by the Legislative Reference Bureau***

This bill prohibits the Department of Corrections and counties from entering into contracts for intrastate telecommunications service or video communication service that is initiated from a telephone or video communication device designated for use by inmates in a jail or state prison (inmate telephone or video communication service) if those contracts do not comply with rules promulgated by DOC.

The bill requires DOC to promulgate rules regarding the rates, tolls, and charges and the terms and conditions of inmate telephone or video communication service. Under the bill, these rules must follow the principle that inmates, whether convicted or awaiting trial, who place telephone calls or initiate video communication, and persons receiving telephone calls or video communication from inmates, should not be subject to rates, tolls, and charges that exceed those that

major, national prepaid wireless telephone providers charge their customers. The bill also prohibits any rate, toll, or charge from being imposed for a telephone call or video communication with an inmate's attorney placed from a telephone or video communication device designated for use by inmates.

Before a county may enter into a contract for inmate telephone or video communication service, the bill requires the county to submit the contract to DOC for approval. Under the bill, DOC may not approve such a contract unless it complies with its rules. The bill provides that a county contract entered into without prior DOC approval is void.

Under the bill, a DOC contract for inmate telephone or video communication service that violates DOC rules is void.

For further information see the state and local fiscal estimate, which will be printed as an appendix to this bill.
