Analysis by the Legislative Reference Bureau

This bill allows a city, village, town, or county (political subdivision) to apply to the Public Service Commission for certification as a Telecommuter Forward! community. The PSC must make the certification if the political subdivision adopts a resolution that states its support and commitment to promote the availability of telecommuting options and that provides for a single point of contact for coordinating telecommuting opportunities. The point of contact must have specified responsibilities, including the following: 1) coordination and partnership with telecommuting stakeholders; 2) collaboration with broadband providers and employers to identify, develop, and market telecommuter-capable broadband packages; and 3) communication and partnership with broadband providers and economic development professionals to develop common goals. In addition, the point of contact must be responsible for promoting telecommuter-friendly workspaces if such a workspace has been established in the political subdivision at the time it adopts the resolution. The PSC must prescribe the form and manner for making an application and a process for public notice and comment. Before approving an application, the PSC must consider any public comments.

The bill also creates a Telecommuter Forward! council and requires the PSC to consult with the council in carrying out its duties under the bill. The council consists
