4 Assistance program and database confirmation for public assistance program
5 eligibility.

Analysis by the Legislative Reference Bureau

This bill makes various changes to eligibility determinations for public assistance programs and, specifically, the Medical Assistance program. The Medical Assistance program is a joint federal and state program that provides health services to individuals who have limited financial resources.

The bill prohibits the Department of Health Services from automatically renewing the eligibility of a recipient for Medical Assistance program benefits. DHS must determine an individual's eligibility every six months under the bill. DHS is also prohibited from using prepopulated forms or otherwise supplying information, except for name and address, to a recipient of or an applicant for Medical Assistance that has been supplied to DHS. Additionally, any recipient of Medical Assistance benefits that fails to timely report to DHS or its designee any change that may affect eligibility is ineligible for benefits for six months from the date DHS discovers the failure to report the change. Under current law, knowingly concealing or failing to disclose any event that an individual knows affects the initial or continued right to a Medical Assistance benefit is subject to a forfeiture of not less than \$100 nor more than \$15,000 for each concealment or failure.

ASSEMBLY BILL 934

The bill requires DHS to enter data sharing agreements with any agency that maintains a database of financial or personal information about residents of this state. DHS must confirm the information of an applicant for a public assistance program against the information contained in those databases. The bill also requires DHS to share data for this purpose of confirming eligibility for public assistance programs. Current law requires DHS and the Department of Children and Families to compare each department's respective databases against the databases of death records to identify deceased participants.

The bill requires DHS to promptly remove from eligibility for the Medical Assistance program any individual who has been determined to be ineligible for the program. Under the federal Families First Coronavirus Act, during a federally declared public health emergency, a state may receive an enhanced amount of federal financial participation in its Medical Assistance program if the state complies with certain criteria, including refraining from disenrolling individuals from the program. Under the bill, if the disenrollment or any other part of the bill would cause the state not to comply, that portion of the bill that does not comply may not be implemented until the period of enhanced federal financial participation ends. During the period before it ends, DHS must audit Medical Assistance eligibility and report quarterly to the legislature the number of individuals who are ineligible for Medical Assistance but who are receiving benefits.

For further information see the state fiscal estimate, which will be printed as an appendix to this bill.
