***Analysis by the Legislative Reference Bureau***

This bill makes changes to this state’s electronic waste recycling program, known as “E-Cycle Wisconsin,” which is administered by the Department of Natural Resources (DNR).

***General program requirements; covered electronic devices***

Under the program, a manufacturer may not sell certain consumer electronic devices to households or schools in this state, or deliver consumer electronic devices to a retailer, unless the manufacturer registers with DNR each year, pays a registration fee, and either recycles a certain amount of consumer electronic devices or pays a shortfall fee. A retailer may not sell certain consumer electronic devices to households or schools in this state unless the device’s manufacturer is registered under the program. A recycler that receives electronic devices on behalf of a registered manufacturer must also register under the program and comply with certain reporting and recordkeeping requirements.

This bill expands the type of consumer electronic devices covered under the program to include video game consoles, all video display devices with screens of at least seven inches measured diagonally, and peripherals, such as keyboards or speakers, that are sold for external use with a video display device, such as a television.

***Manufacturer target recycling weights***

This bill changes the method for calculating a manufacturer’s target recycling weight for a program year.

Under current law, a manufacturer’s target recycling weight for a program year is 80 percent of the weight of electronic devices that the manufacturer sold during the program year preceding the previous program year.

**SENATE BILL 621**

Under this bill, a manufacturer's total target recycling weight for a program year is a certain percentage of the total weight of electronic devices that all registered recyclers received for recycling during the program year preceding the previous program year. In general, the percentage applied in this calculation for a program year is the average weight of electronic devices that the manufacturer sold in this state during a certain two-program-year period, divided by the average weight of electronic devices sold in this state by all registered manufacturers during that two-program-year period.

This bill eliminates the existing recycling weight bonus for electronic devices recycled from rural counties, and instead requires that 10 percent of a manufacturer's total target recycling weight for a program year consist of electronic devices recycled from rural counties (target rural county recycling weight).

This bill also requires DNR, at least two months before the beginning of a program year, to notify each registered manufacturer of its total target recycling weight and target rural county recycling weight for the upcoming program year.

***Manufacturer shortfall fees***

Under current law, a manufacturer must pay a shortfall fee with its annual registration if it did not recycle enough electronic devices during the previous year to meet its target recycling weight.

This bill creates a separate rural county shortfall fee, which must be paid if the manufacturer failed to meet its target rural county recycling weight for the previous year.

Under the bill, if a manufacturer exceeds its total target recycling weight by more than 20 percent for a program year, the manufacturer may elect to be exempt from any rural county recycling weight shortfall fee owed for that program year. If a manufacturer elects to be exempt from the rural shortfall fee for a program year, the manufacturer may not accumulate any recycling credits for that program year.

***Manufacturer recycling credits***

Under current law, a manufacturer gains a certain number of recycling credits if it recycles more than its target recycling weight during a program year.

This bill allows a manufacturer to accumulate rural county recycling credits if it exceeds its target rural county recycling weight during a program year. The manufacturer may apply these rural county recycling credits toward meeting its total target recycling weight or its target rural county recycling weight for the succeeding program year, or may sell them to another manufacturer. Under the bill, a manufacturer's total recycling credits, earned from exceeding its total recycling weight for a program year, may be applied only toward its total target recycling weight and may not be used toward meeting its target rural county recycling weight.

***Manufacturer reporting requirements***

Under current law, a manufacturer must report certain information to DNR when it submits its annual registration under the program.

This bill requires manufacturers, when reporting the total weight of electronic devices recycled by or on behalf of the manufacturer each year, to also report the weight of devices collected from rural counties separately from devices collected from urban counties.

**SENATE BILL 621*****Manufacturer registration fee***

Under current law, a manufacturer must ordinarily pay a registration fee with its annual registration, based on the number of electronic devices it sold in the state during the previous year.

This bill raises the threshold for requiring a manufacturer to pay a registration fee. Under the bill, a manufacturer's registration fee is \$5,000 if it sold at least 500 electronic devices in this state during the previous program year, and \$1,250 if it sold at least 250 but fewer than 500 electronic devices. There is no registration fee if the manufacturer sold fewer than 250 electronic devices during the previous program year.

***Recycler reporting requirements***

This bill changes the reporting requirements for registered recyclers.

Under current law, every year a registered recycler must report to DNR the total weight of electronic devices the recycler received from a registered manufacturer for recycling during the previous program year.

This bill requires a recycler, in its annual report, to also separate this total weight into different categories, depending on the type of device and whether the device contains a cathode-ray tube. The bill also requires a recycler to report the weight of certain materials, such as cathode-ray tube glass, metals, and plastics, that the recycler derived from the electronic devices it received during the previous program year.

***Program year***

Under current law, a program year runs from July 1 to the following June 30. This bill creates an 18-month transition period (transition year) that runs from the July 1 following the effective date of the bill to the December 31 of the following year. After the transition year, a program year runs from January 1 to December 31.

For further information see the ***state*** fiscal estimate, which will be printed as an appendix to this bill.

22          2. If the program year for which the calculation is made is the 3rd full program  
23          year during which the manufacturer's covered electronic devices are sold or offered  
24          for sale to households or schools in this state, determine the weight of covered  
25          electronic devices sold to households or schools in this state by the manufacturer

**SENATE BILL 621****SECTION 30**

1 during the program year that began 3 program years before the beginning of the  
2 program year for which the calculation is made, as reported by the manufacturer  
3 under sub. (5) (a), subject to subd. 5.

4 3. Determine the average weight of covered electronic devices sold to  
5 households or schools in this state by all registered manufacturers during the  
6 2-program-year period that began 4 program years before the beginning of the  
7 program year for which the calculation is made, based on the total of all weights  
8 reported under sub. (5) (a) by all registered manufacturers for those program years,  
9 subject to subd. 5.

10 4. Divide the amount determined under subd. 1. or 2. by the amount  
11 determined under subd. 3.

12 5. If a program year used in a calculation under subds. 1. to 3. was the transition  
13 year, multiply the weight of covered electronic devices sold to households or schools  
14 in this state during the transition year by two-thirds before using that weight in  
15 subds. 1. to 3.

16 **SECTION 31.** 287.17 (3m) (c) of the statutes is created to read:

17 287.17 (3m) (c) *Target rural county recycling weight.* At least 10 percent of a  
18 manufacturer's total target recycling weight for a program year shall consist of  
19 eligible electronic devices used by households or schools in rural counties. A  
20 manufacturer's target rural county recycling weight for a program year is the  
21 amount determined under par. (a), multiplied by 0.1.

22 **SECTION 32.** 287.17 (3m) (cm) of the statutes is created to read:

23 287.17 (3m) (cm) No later than 2 months before the beginning of each program  
24 year, the department shall notify each registered manufacturer of its total target

**SENATE BILL 621**

1 recycling weight determined under par. (a) and its target rural county recycling

4 287.17 (3m) (d) 1m. If the number of rural county recycling credits calculated  
5 under subd. 2. is a positive number, the number of recycling credits that a  
6 manufacturer accumulates under subd. 1. is the number calculated under subd. 1.,  
7 less the number calculated under subd. 2.

8 **SECTION 34.** 287.17 (3m) (d) 1r. of the statutes is created to read:

9 287.17 (3m) (d) 1r. If a manufacturer has accumulated any credits before the  
10 beginning of the transition year, the manufacturer may use these credits for the  
11 purpose of determining its actual total recycling weight under par. (e) 1. for the  
12 transition year or may sell these credits to another manufacturer for the purpose of  
13 determining that manufacturer's actual total recycling weight under par. (e) 1. for  
14 the transition year.
